EXPLANATORY NOTE :

It has come to the notice of the Government that in several cases, fires are kindled in forest area of tendu unit/group of units during the period January onwards with the expectation that as a result of fire, good flush of tendu leaves would come. Due to such fires almost entire forest area in tendu units or in the vicinity, burns every year and irreversible damage is caused to the natural re-generation, fallen seeds, nests and habitats of microfauna, wild life and the ground flora including the valuable biodiversity of the area. The various Acts and Regulations have cast responsibilities on the citizens, Gram Panchayats/ Gram Sabhas to protect forests from the damages caused due to such fires by taking preventive measures. In order to prevent fires due to tendu trade, the strict measures as stated above are considered essential and it is believed that due to such measures sustainable harvesting of tendu leaves, due to which huge economic benefits accrue to the local people and tendu leaves collectors during tendu season, would continue without causing any damage to the forest in the tendu units/group of units or in the vicinity.

- (a) The Deputy Conservator of Forests shall prepare a list of all villages in his jurisdiction where the incidences of fire on the forest area of more than 1 hectare within the limits of forest villages boundaries during the period 1st January to the date of auction i.e. before tendu leaves are auctioned and sold to a particular licensee .
