Date: 26th September 2002.

GOVERNMENT OF INDIA
MINISTRY OF ENVIRONMENT & FORESTS
PARYAVARAN BHAVAN, C.G.O. COMPLEX
LODHI ROAD, NEW DELHI- 110003

To,

1. Secretary (Forest & Wildlife) all States
2. The Chief Wildlife Wardens (All States/UTs)

Sub: Annual Plan of Operations (APOs) 2002-2003 under Centrally Sponsored Scheme "Protection of Wild Life outside Protected Areas"- invited.

Sir,

The undersigned is directed to invite proposals for seeking central assistance under the Centrally Sponsored Scheme "Protection of Wild Life outside Protected Areas" for the year 2002 -2003 so as to reach this Ministry latest by 31st October 2002. Please note that this is a new scheme being introduced during the Xth Plan.

1. Guidelines for sending proposals under this scheme are appended.
2. The proposals may be sent by government speed post in the name of undersigned.
3. The proposal should accompany species-wise census report for major species.
4. Number of poaching cases detected every year since 1997 for all major species should be provided.
5. Details of the important cases of seizure of wildlife and wildlife products should accompany the proposal.
6. In lieu of the already identified places State governments if find essential, may suggest an alternate place for stationing the mobile protection unit.
7. The proposal submitted for central assistance should have the approval of the State Government to avoid the possibility of central assistance not getting utilised for want of subsequent sanction from the State Governments. However, an advance copy of the proposal may be sent.
8. After scrutiny of the proposals meeting with Chief Wildlife Wardens will be fixed if required, dates for which will be intimated separately.

Yours faithfully,

(Jagmohan Sharma)
Joint Director (WL)

Copy to:

1. Principal Chief Conservator of Forests (All States/UTs).

Centrally sponsored Scheme “Protection of Wild Life outside Protected Areas”

Name of the scheme

“ Protection of Wild Life outside Protection Areas”

The objectives of the scheme

- Prevention of poaching and control of illegal trade in wild life, its derivatives and parts outside Protection areas.
- Strengthening the capabilities of State Forest departments in intelligence gathering, investigation and prosecution of wild life offence cases.
- Assist the State Governments in strengthening the forensic labs, particularly for wild life related crimes.
- Mitigate man-animal conflicts through adequate and expeditious payment of compensation for loss of life and damage to property.
- Provide assistance to local communities for establishing translocation units and rescue facilities for wild animals.
- Education and awareness campaign for the protection of Wild life and their habitats.

The description of the scheme

The Scheme aims to develop and strengthen the capability of the State to provide protection to Wild life outside Protection Areas and to check smuggling of wild life products. For this purpose, establishment of mobile protection units and equipping them with modern arms and communication facilities get priority. The protection unit will be deployed to patrol vulnerable areas including those forming routes of interstate and international clandestine trade. These units will function under the local Conservator of Forests/Deputy Conservator of Forests (Wild Life) having jurisdiction. Each wild life protection units will be headed by an officer of the rank of Police Sub Inspector/ Range Forest Officer. He will be assisted by two-havildar/ forester, 8 constable/guards and 1 driver in discharging his official responsibilities. These units will be located at 80 different locations all over the country in the 21 states. The location of these units will depend upon the sensitivity of the areas. Each unit will be provided with communication equipment's, arms and ammunition, vehicles, night vision scopes, binoculars, spot lights, GPS, etc.

The Scheme also provides for:

- Purchase of vehicles-preferably, 4-wheel drive and motor boats etc.
- Rewards for outstanding performance.
- Funds for intelligence gathering. Establishment of Community crawls.
- Development support to the state forensic labs.
- Animal rescue facilities.
- Compensation payment.
- Education and awareness.

Finding pattern

This is Centrally Sponsored Scheme where the Central Government would provide 100% assistance to the State Governments/Union Territories and the executing agency for the scheme will be the wildlife departments under the direct administrative control and supervision of the Chief Wildlife Warden of the State Governments.

Area of operation

The scheme will cover 80 sensitive locations in different states in the country. The state wise location is given at Annexure I. The States may change the location according to sensitivity of the area with prior approval of the Ministry of Environment & Forests.

Eligibility items for assistance

The items for which assistance is to be provided are given in Annexure II.

Staff under the scheme

The Mobile Protection Units are to be manned by the staff redeployed from Forest and/or Police Department. No new post will be created.

APPENDIX NO. XLV

(Vide Para II-7.7.9)

STANDING ORDER 001

FROM PRINCIPAL CHIEF CONSERVATOR OF FORESTS (WILDLIFE) MAHARASHTRA STATE, NAGPUR

Issued on 07.03.2003

Measures for protection of wildlife outside the protected areas

Geographical area of Maharashtra State is 307 lakh hectares. Out of this 63 lakh hectares are under forests cover. These forests are under the control of the Revenue and Forests Departments to the extent of 8 lakh and 55 lakh ha respectively. Various wild animal species exist in these forests and also outside. Depletion of forests has created a major problem related to wild animal habitat and protection like increase in wildlife poaching and illegal trade/ smuggling. Sanctuaries and National Park are established to provide protection to wildlife. In all 35 Sanctuaries and 5 National Parks which includes 3 Tiger Projects are established in the state of Maharashtra. The area thus formed as Protected Area (PA) is 7 lakh ha. Apart from this, area formed as Great Indian Bustard (GIB) sanctuary is 8 lakh ha. There is a separate wing under forest department to manage these PA's. In the national level wildlife estimation (Census), year 2001, it is revealed that wildlife population especially that of Tiger in the Non PA areas is declining steadily every year. If proper measures are not taken then Tiger and other wild animal species will become extinct, causing a serious environmental crisis which in turn will affect the quality of the existing forests and their conservation in general.

The main reason behind this depletion in wildlife population in these areas is lack of proper protection as well as lack of enough measures and initiative to conserve their habitat and surrounding. The way wild life habitat and water hole development is looked after in PA's is not looked as well in non-PA areas. In non-PA areas wildlife is facing poaching, habitat destruction and fodder and water shortages, which causes a serious threat to their breeding and conservation. Illegal poaching and insufficient breeding, results in faster depletion of population than expected. In these circumstances, we need to act urgently to protect forests and wildlife so as to check environmental degradation. Conservators, Deputy Conservators and Assistant Conservators of Wildlife wing will assist, co-operate and guide the

territorial staff (officers and other employees) technically to save wildlife and its habitat in the areas outside PAs.

Tiger, which is the symbol of safe and healthy environment, it at the apex in the food pyramid and hence it is utmost important to protect it for the continuance of life on mother earth. In Maharashtra during the All India Estimation of Tigers in 2001, the total of 238 Tigers were recorded. The population of Tiger is stable in the PA's for last 8 to 10 years but it is not so outside. Hence it is the need of the hour to concentrate on the protection of Tigers in these areas.

The officers/employees working for the cause of forests conservation out side the PAs such as those working for Forest Department (territorial), Social Forestry and Forest Development Corporation cannot pay special attention for the protection and conservation of wildlife. In this regard Chief Conservator of Forests (WL) has issued suitable instructions through his letter No. Desk- 23(6)/190 dated 25/4/2001.

Under the Wildlife (Protection) Act 1972, the state government delegated vide its letter No. Desk 22 (A)(4)/C.No.117/1180 dated 23.9.1993 certain powers to forest officers at all levels for the protection of wildlife and to take appropriate measures for anti poaching. The Chief Conservator Forest (WL) vide his letter No. Desk-23(3)/2899 dated 25-1-2002 had prescribed measures to control crop damage by wild boars.

For effective wildlife protection and conservation in non PA areas, the following consolidated standing orders are issued for immediate implementation:

1.0 Establishing secret information network for wildlife protection

It is most important for all forest officers to establish informer networks at their level to prevent and investigate into offences related to wildlife. Local villagers, vanmajurs and Forest Guards are generally aware of all activities in their areas. Senior officers should interact more with local staff and villagers and solicit important information from them. They should also offer suitable rewards to the officers and staff who excel in curbing illegal poaching and trade in wildlife. A note of such work should be taken in their service books.

Territorial forest officers are hereby intructed to implement the following protection and antipoaching measures in the areas under their jurisdictions:

1.01 All the forest officers, right from forest guard onward will remain always alert in their daily duties regarding wildlife protection and conservation.

1.02 The concerned Deputy Conservator of Forests will prepare an annual plan for such areas including budgetary provisions. They will also inform their higher officers immediately about illegal hunting and other incidences.

1.03 The above measures include following items:

A) **Measures to be taken by the Forest Guard :** Forest Guard is an important institution of wildlife protection. Obtaining all preliminary information about wildlife related information/offences from him and following them up well help to control wildlife offences.

The forest guard should therefore –

- 1) Always move around and acquaint himself thoroughly with the entire area including wildlife habitats and water holes under his jurisdiction.
- 2) Get conversant with all important wildlife species found in his beat. He must gather information about location and movement of wild animals by moving around in the beat and also by soliciting information from locals.
- 3) Since poaching by tapping electric transmission lines passing through the forests is on the rise, the Forest Guard must inspect the lines regularly, to prevent poaching by electrocution also to avoid accidentally touching them while at night.

B) **Measures to be taken by the Forester:**

Supervise the Forest Guards regarding performance of duties as prescribed above.

- 1) Keep record of all water bodies especially those water holes, which hold water even during acute scarcity period and depict them on a suitable map of his Round.
- 2) Regularly inspect all these water holes and ensure that miscreants do not poison them.
- 3) Take up night patrolling along with the Forest Guards and their assistants.
- 4) Report all cases of cattle kills and human loss due to wild animals to higher officers within 12 hours.
- 5) Take precaution that the carcass of dead cattle is not poisoned.
- 6) Keep record of all weapon holders in his jurisdiction.

C) Measures to be taken by Range Forest Officer:

- 1) Take regular review of all the measures taken by Foresters and Forest Guards under his control.
- 2) Earmark sensitive zones on his range map, which will include details like an electric transmission lines, areas of abundant wild animals, location of licensed weapon holders etc.
- 3) Ensure that the Foresters/Forest Guards regularly patrol the sensitive area and also obtain Beat “Khariyat” report. The report will include information on movement of wild animals especially that of Tigers and Panthers.
- 4) Regularly visit and if required, stay overnight at the beat headquarters and keep contact with the locals and thereby build his own secret network.
- 5) Deal promptly in cases of cattle kills by wild animals to compensate their owners expeditiously.
- 6) Ensure that no illegal sale of wild animal meat is carried out, specially in weekly bazaars and he must obtain regular reports of the same from his subordinates.
- 7) Ensure that there is no illegal collection of Tendu leaves from PAs and there surrounds (3 kms) and see that legal action is initiated against the concerned, including the contractors accepting such Tendu leaves.

D) Measures to be take by Assistant Conservator of Forests

- 1) Regularly obtain reports regarding wildlife protection from their Forest Guards/Forester and RFOs, and through surprise checks ensure all his subordinate staff are carrying out their duties as prescribed.
- 2) Regularly patrol the sensitive areas under his jurisdiction with local staff and monitor the movements of suspicious offenders.
- 3) Supervise and ensure that fire protection measures are carried out timely and effectively.
- 4) Powers to enquire in to the offences related to wildlife are vested with Assistant Conservator of Forests. Therefore he should pay proper attention to every enquiry and ensure that self contained and water tight complaints are filed in the Court. He should submit regular review of all the court cases to his Deputy Conservator of Forests/Conservator of Forests. He also must ensure that all the witnesses attend their cases timely. If this is not happening then he should report the matter to the Hon. Court.

1.4) The Government vide its order No. Desk-22(D) (1)/C.No.117/1180 dated 23-9-1993 delegated certain powers to forest officers under WPA 1972. Some of the important sections and powers delegated under them are given below:

Sr No	Section of the Act.	Extent of power	To whom delegated
1	11(1)(b)	Power to grant permission to hunt a wild animal other than sch 1 which has become dangerous to human life or to properly.	Addl. CWLW, Dy.CWLW
2	39(2)	Power to receive the report of and to take over possession of Govt. property.	Addl.CWLW, Dy.CWLW, Wildlife Wardens and Asst.Wildlife Wardens.
3	40(1)	Power to receive declaration by a person in control, custody or possession of any captive animal specified in sch. 1 or part II of sch- II.	Addl. CWLW, Dy.CWLW
4	41(1)	Power to enter upon the premises to make enquiries, prepare inventories of animal articles etc. and to affix identification mark etc.	Addl.CWLW/ Deputy CWLW/W.L.W/ Asst WLW
5	50(1)(3)	Power to enter upon and search any premises and search any vehicle etc. and to seize etc.	Addl.CWLW/ DeputyCWLW/W. L.W/Asst WLW
6	54	Power to compound offences	Addl.CWLW/ Deputy CWLW/
7	55	Power to make complaint to the court	Addl.CWLW/ Deputy LW/W.L.W/ Asst WLW/Honorary WLW

Deputy Conservator of Forests should regularly monitor works of Forest Guard/Forester/RFO's and check their wildlife related records.

1.5) Wild animals sometimes do venture in to the villages surrounding from forests and thereby come in contact with villagers. Villagers residing in the forest look at these animals with fearful reverence. Therefore it is essential to keep the villagers educated about wildlife through leaflets, video cassettes and through direct meetings. It is the duty of all to increase sympathy among the masses for wildlife and to convince them about the need to balance the environment through conservation of wildlife. An important target should be a school student. Normally workshops/seminars/educational tours are conducted in PA areas for staff as well as locals but in non-PA areas it is not so arranged. Therefore Deputy Conservator of Forests/Conservator of Forests (territorial) must look into specifically and see that minimum of 2 education tours/ workshops will be held for Forest Guard/Forester/Village Protection Committee and locals in every range and every year. The cooperation of wildlife wing may be taken. They should include this in APO and budget and implement the same.

1.6) Considering gradual decrease in the wildlife population the Deputy Conservator of Forest / Conservator of Forests (territorial) will identify areas, where endangered and schedule I species such as the Tiger, Panther, Bear, Wild dog are normally found and take shelter, and use as breeding grounds. Such area should be declared as "sensitive areas". The Conservators/Deputy Conservators will prepare annually operation plan and make budgetary provisions for the measures proposed to be carried out in such areas and ensure that these are effectively implemented. The measures shall include following three points:

- 1) A division level critical report for sensitive area shall be prepared mentioning population of existing wild animals, their status and whether they are on the verge of extinction at local as well as state levels.
- 2) The information about the sensitive area is to be gathered and shown on each Range map depicting the animal's habitat, breeding grounds, movements area (corridors) etc. The perceptible threats to their

survival must also be identified and measures to be implemented to overcome these.

- 3) The information about the availability of water and fodder in the area should be collected and measures must be implemented to overcome the limiting factor regarding it.

An action plan thus prepared at the division level must be implemented and the implementation of it must be reviewed regularly at the Conservator of Forest's level. This will take care of the conservation, breeding and protection of wildlife and will help to restore their population and stabilize the population.

1.7) Street performers (madaris) earn their livelihood by displaying Bears, Monkeys, snakes and Mongoose and for this purposes they are subjected to cruelty. Wild animals are ill-treated during their training. Hence the Central Government has banned all such performances by Lions, Tiger, Panther, Bears and Monkeys. The legal action shall be initiated wherever violation of the said order is observed.

1.8) Some animals like Deer, Moongoose, Hare, birds, snakes and in some exceptional cases predators like Panther and Tiger are kept in captivity without legal permission. An offence must be booked in such cases. Hunting of all wild animals is prohibited under WPA 1972 and it is a cognizable offence. This information must be explained to all.

2.0 **Keeping track of wild animals movement**

Wild animals move inside or even outside the forests, Local staff should keep a track of movement of these wild animals. Specially Tiger, Panther and Black buck. Wild animals stray outside the forests specially in rainy and summer seasons and it is observed that during this season, they are likely to get hunted/poached. During this season forest staff should keep a track of their movement and take care that nothing untoward happens to them by the miscreants. It also should be borne in mind that the miscreant does not use this information.

3.0 Help of the local Forest Protection Committees.

As number of local Forest Protection Committees has been established. They can actually help in a coordinated manner to collect information about animals found outside the boundary of NP and sanctuaries. In many cases they stray out of these borders and some times get killed. The forest staff from such areas shall collect such information from these Forest Protection Committees (F.P.C's) and this may be incorporated in their main objectives, if required.

3.01) Wild Animal Protection Committee.

Many species of wild animals are found in surrounding forests of NP and sanctuaries. In the adjoining villages where "Joint Forest Management Committees" have been established, a subcommittee for the protection of wild animals will be established. It is expected that there will be 3000 such sub-committees and wildlife conservation and protection will be the main objectives of these sub-committees. The proposal may be submitted to utilize the funds for the development through Central Government's Eco-development schemes.

4.0) Illegal Trade in Wildlife

It was revealed during the review of pending wildlife related court cases that a large number of wildlife offence cases are detected, booked and filed in the various courts but are not monitored regularly in the courts which result in the acquittal of offenders. Therefore all court cases must be monitored regularly. Every forest divisions must prepare a list of accused and suspicious offenders. A list with photographs of all the habitual offenders must be maintained and kept in range offices.

4.01) Trading and even export of Deer and Sambar shed antlers was going on till the year 1998. Government of India Commerce Ministry's resolution dated 4.8.1998 has prohibited export-import of the shed antlers. It has also banned export of Peacock feathers, but dealing in peacock feathers in the domestic market has not been effected. In this regard Conservator of Forest's/Deputy Conservator of Forest's/RFO's shall ensure proper implementation of these orders.

5.0) Man-Animal Conflict.

It is utmost important to balance the environment through wildlife protection. According to National Forest Policy 33% area should be under forest cover and it is essential to keep maximum area of this as PA. The ever

decreasing forest cover and ever increasing people's demand does not go hand in hand, which leads to tussle between wildlife and local community. The population of wild animals is on the rise in PA's due to protection they get, whereas herbivores are increasingly raiding the adjoining fields and cause severe crop damage Forest departmental has received number of applications in this regard. Hence the government took cognizance and has set up a Secretary level committee under the chairmanship of Chief Secretary. The committee has taken following three decisions:

- 1) Insurance against crop damage.
- 2) Raising stonewall between fields and forest to prevent crop-damage.
- 3) Hunting wild pigs, if it is unavoidable.

Out of above decisions, insurance against crop damage is pending for finally decision at Govt. level, Whereas other two are finally decided. Constructing stone wall against crop damage is to be taken up under EGS. The estimates of these works shall be sanctioned through concerned District Collectors. This office has issued detailed instructions vide letter No. Desk-23(3)/Secretary level /2899 Dated-25.1.2002 for hunting of wild pigs. These instructions are to be followed and implemented.

6.0 Appointment of Honorary Wild Life Wardens and their duties.

Honorary wild life Wardens have been appointed for each district as per section 4 (1)(bb) of WPA 1972. They have been delegated to use powers of sections 55 vide Govt. Resolution dated 27/9/2002 honorary wildlife Wardens are expected to perform following duties.

1. Control poaching and clandestine trades in wild animals and products / articles thereof.
2. Identify and select the areas suitable to be declared as Sanctuaries, National Park for proper Conservation and Protection and Wildlife.
3. Prevent damages to Wildlife habitats.
4. Take appropriate measures against damage by wild animals to life and economy.
5. Carry the message of conservation to the people and enlist public support for nature and wildlife conservation.

6. Participate in any other matter related to protection of wildlife which may be entrusted by the Wildlife Advisory Board or CWLW of the state from time to time. It is essential to enlighten and create awareness in the public about nature and wildlife conservation. He is deemed to be a public servant within the meaning of the section 21 of Indian Penal Code and protection for action taken in good faith is provided under section 60 of WPA 1972.
7. Establishment of "Control Cell" at Circle level
A Tiger cell has been formed in the State vide Govt. Resolution dated 7.11.2000 under the chairmanship of Additional Director General of Police (Head quarters) for co-ordination between the Police, Forest and other Department to check poaching and illegal trade in wildlife. Similar committees are also have been formed for each Revenue Commissionerate Division under the chairmanship of Special Inspector General of Police (Range). These committees may be used for the preventing and detection of offences and offenders.

On these lines Conservator of Forest (all) should also form wildlife crime detection and monitoring cell at their circle level under the chairmanship of Divisional Forest Officer (Vigilance) and at each division level under Range Forest Officer (Mobile Squad). These cells must be formed immediately and intimated to the Chief Conservator of Forest, Conservator of Forest, Deputy Conservator of Forest will review the progress of these cells every month. The circle level cell will remain in touch with the revenue division level tiger cells. The Chief Conservator of Forest (Protection) and Conservator of Forest (territorial) will review the performance of these circle level cells while reviewing the conservator of Divisional Forest Officer (Vigilance).

8. Other important instructions

- 8.01 When any wild animal is found dead due to suspected poaching or accident, the carcass should be disposed of after drawing "Panchnama". No part of the dead animal should be

prescribed unless required as part of a court case. The whole carcass of Tiger and Panther shall be disposed by burning.

- 8.02 The preliminary information regarding death of wild animal will be sent by the concerned Range Forest Officer within 12 hours of detection to the division office. The Deputy Conservator of Forest /Division Forest Officer will inform the concerned Conservator of Forests and Chief Conservator of Forest (WL) within 24 hours after detection. He should also visit the spot within 24 hours. All Conservator of Forests and Deputy Conservator of Forests have been instructed in this matter by Chief Conservator of Forests (WL) vide his letter no. desk 23 (B)/07 dated 3.4.2001 it is important to inquire preferably and immediately into the offences related to wildlife.
- 8.03 The detailed information to be submitted within a week after preliminary information shall include all the information in the enclosed proforma. (Appendix. **IV**). The Deputy Conservator of Forest will submit this proforma by speed post to concerned Conservator of Forest and Chief Conservator of Forest (WL). All the officers shall see that control and monitoring of offences will be effective after the information of above mentioned circle and division level "detection and monitoring cell" it is required to concentrate the focus on the cases detected outside the PA,s. therefore Chief Conservator of Forests (Protection) and Conservator of Forests (territorial) shall taken regular review of "Detection and monitoring cell" and required Deputy Conservator of Forest shall taken guidance and help on technical matters from Conservator of Forests (WL) and Chief Conservator of Forests (WL).
- 8.04 The works like formation of new water bodies, planting fruit species, meadow development shall preferably be undertaken for conservation and development of wild animal habitat. The development of habitat will boost the population of herbivores, which in time increase the predator population. Regular desilting of waterholes, forest tank, forest bandharas and anicuts shall be done to make water available during summer

and pinch period. It is also important to guard them from poachers and domestic cattle.

- 8.05 In conservation and development of wild animals, continuity of forest cover is essential to avoid inbreeding and to bring forth genetically viable future generation. In today's scenario these forest are fragmented and connected to each other either through agriculture fields or fallow lands. Therefore it is essentially to educate the local community living around these areas and remove the hinderance from corridors to maintain the continuity. This includes regular maintenance of all the important water bodies frequently used by wild animals and to ensure that these are not shared by domestic cattle. Separate drinking water facility shall be corrected for cattle around villages and regular vaccination programs shall be undertaken, so as to avoid spreading of communicable disease. Forests officers through meeting/seminars shall convince the local villagers about reducing the disturbance in these areas.
- 8.06 To reduce the conflict between wild animals and local villagers, cooperation from police patil, gramsevak, office bearers of grampanchayats, and NGO,s should be sought. The empathy for wildlife should be corrected among the local villagers and it should be utilised for protection. The Constitution also vests every citizen with the responsibility to protect wildlife.
- 8.07 Villagers living near the forest use water for their daily needs from the sources within the forest, such as rivers, streams and forest tanks etc. this may cause a reason for conflict between wildlife and villages. Therefore local forest officers shall bring this to the notice of district administrations in writing and follow up the matter.
- 8.08 The Deputy Conservator of Forests shall visit to actual spot in case of death of Tiger, Panther, Black buck and other schedule species.
- 8.09 The officers/employees working at different levels in Forests, Social Forestry and Forest Development Corporation shall collect information in the area under their jurisdiction and submit the same regularly to their superior officer and shall

implement above instructions meticulously. All the officers/employees whenever in tour for inspection shall review the measures implemented for the conservation and protection of wildlife and suitable instruction may be given. Senior officer shall take a note in every officers and employees confidently report (CR) regarding his contribution towards wildlife.

HOW TO USE GPS GRAMIN - 72**GARMIN 72**

Note: when moving with pointer the message received is arriving destination and when moving with highway we get both messages that arriving destination and turn right or left.

Marking a waypoint:

1. Press and hold the **ENTER/MARK** key.

When the **ENTER/MARK** key is held down, the **MARK** function of the key is activated. The GPS 72 will capture its current location, and display the Mark Waypoint Page. By default, the unit will assign a square as the symbol, a number as the name, and the 'OK' Button will be highlighted. Pressing the **ENTER** key now would save the waypoint using the default name and symbol, but let's change them to something more meaningful.

Changing the symbol:

1. Using the **ROCKER** key, highlight the Symbol Field, then press **ENTER**.
2. Using the **ROCKER** key, highlight the 'Scenic Area' symbol, then press **ENTER**.

Changing the name:

1. Using the **ROCKER** key, highlight the Name Field then press the **ENTER** key.
2. Press the **ROCKER** key to the left, this will clear the name field.
3. Press the **ROCKER** key up, scroll through the alpha-numeric list until 'C' is selected.
4. Press the **ROCKER** key right to move to the next placeholder.
5. Press the **ROCKER** key down, scroll through the alpha-numeric list until 'R' is selected.

You should be starting to get the feel of it. Continue entering letters until you have spelled the word CREEK.

6. With the letter 'K' highlighted, press the **ENTER** key to accept the name.

You can enter any name that you like as long as it does not exceed ten characters, and does not duplicate a previously saved waypoint. When you have finished renaming the waypoint you will need to store it in the units' memory.

To store the waypoint:

1. Using the **ROCKER** key, highlight the 'OK' Button and press the **ENTER** key.

These are the same steps that you will use to enter names, change numbers and select options in all of the GPS 72 fields.

Here are a couple of tips:

- If you press and hold the **ROCKER** key while scrolling through the alpha-numeric list, it will move quickly.
- You can scroll through the alpha-numeric list in either direction.
- Don't press the **ENTER** key until you have finished entering the data. Remember, use the **ROCKER** key to move to the next placeholder.
