APPENDIX No. XIX
DETAILS OF A - FRAME

A फेम

उताराच्या जमिनीची समपातळी ठरवून बांधबंधिस्ती करण्यासाठी

A फेमचा वापर

A फेम तयार करण्यासाठी लागणारे साहित्य :

- 1) थोडीशी लांब दोरी
- 2) एक चपटा खडबडीत दगड
- 3) 3 बांबू (सरळ सारख्या लांबीचे दोन व त्यापेक्षा कमी लांबीचा एक बांबू)

A फ्रेम तयार करण्याची पध्दत :

- **AB** व **CD** असे दोन (2.5 ते 3 मिटर लांबीचे सरळ बांबू एकमेकांवर गुणकाराच्या खुणेसारखे ठेवतांना **A** व **C** टोकाकडचे अंतर (20 ते 30 से.मी.) समान असावे.
- बांबूच्या तळाशी **B** व **D** टोक पटाशीने छीलून घ्या. जेणेकरून दोन्ही पाय स्थिर राहतील.
- दोन्ही समान बांबूच्या तळाचे टोकापासून 50 से.मी. इतके अंतर मोजून खुणा करून घ्या
- **FG** लहान बांबू (1.5 ते 2 मीटर लांबीचा) खुणा केलेल्या जागी आडवा ठेवा व तेथे करवतीने खुणा करून खाचा करा.
- तिन्ही बांबूचे जोड दोरीने पक्के बांधा व पक्के बांधल्याची खात्री करून घ्या. जेणे करून सांधे घसरणार नाहीत.
- **A** फ्रेम तयार झाल्यानंतर वरच्या सांध्याच्या **E** मध्यावर दोरी पक्की बांधा. ही दोरी दगड बांधल्यावर आडव्या **FG** बांबूच्या 10 से.मी.खालपर्यंत असावी.
- चपटा खडबडीत दगड दोरीच्या **P** तळाला बांधण्यासाठी निवडा, दगड गुळगुळीत नसावा. जरूरी वाटल्यास दगडाला खांच करा, म्हणजे दगड बांधल्यावर दोरीतून निसटणार नाही. दगड घट्ट बांधा.
- **A** फ्रेमच्या मध्यबिंदु काढण्यासाठी फ्रेमचे दोन्ही पाय जमिनीवर ठेवा, फ्रेम सरळ धरा फ्रेमच्या दोन्ही पायाशी खुटया ठोका दोरी (**EP**) जीथे स्थिर होईल तिथे आडव्या बांबूवर खुण करा
- आता फ्रेम उचलून तिच्या पायाच्या जागाची अदलाबदल करा, **P** दगड यावेळी दुस-या ठिकाणी स्थिर होईल तिथे खुण करा, या दोन्ही खुणाच्या मध्य (**N**) काढा आणि खाच पाडा हाच **A** फ्रेमचा मध्य बिंदू होय,

A फ्रेम वापरण्याची पध्दत.

- ज्या क्षेत्रात समपातळी आखायची असेल त्या क्षेत्राच्या वरच्या भागाच्या एका टोकापासून आखण्यास सुरवात करा.
- सर्वप्रथम **A** फ्रेम सरळ उभी धरून त्याच्या एका पायाच्या (**B**)टोकाशी खुंटी ठोका. (**B**) हा पाय स्थिर ठेवून दुसरा (**D**)पाय अशा रितीने वर खाली सरकवा जेणेकरून फ्रेमची(**EP**)दोरी आडव्या (**FG**)बांबूच्या मध्यबिंदुवर (**N**) स्थिर होईल.
- (**EP**)दोरी (**N**)मध्यबिंदूवर स्थिर झाल्यावर फ्रेमच्या **B** ते **D** पायापर्यंत चुन्याने आखून घ्यावा —
- आता फ्रेमचा दुसरा (**D**)पाय स्थिर ठेवून पहिला (**B**) पाय उचला व वळवून ठेवा. पुन्हा त्याच पध्दतीनुसार फ्रेमची(**EP**)दोरी आडव्या(**FG**)बांबूच्या (**N**) मध्यबिंदुवर स्थिर होईपर्यंत वर किंवा खाली सरकवा.
- (**EP**) दोरी मध्यबिंदुवर स्थिर झाल्यावर फ्रेमच्या **D** ते **B** टोकापर्यंत चुन्याने आखून घ्या

- अशा प्रकारे क्रमाक्रमाने फ्रेमचा एक पाय स्थिर ठेवून दुसरा पाय वळवून बाजू बदलत जावे व समपातळी आखावी.
- सम पातळीची आखणी करीत असतांना, नाला किंवा मोठा उंच खडक मध्ये येत असल्यास **A** फ्रेम नाल्याच्या किंवा मोठ्या उंच खडकाच्या दुस-या बाजूला न्या. सुरवात केलेल्या आखणीच्या समपातळीत **A** फ्रेम सरळ रेषेत ठेवून पुन्हा त्याच पध्दतीने आखणीला सुरवात करा.
- पहिली सम पातळी रेषेची आखणी पूर्ण झाल्यावर, उताराच्या मापाप्रमाणे दिलेल्या अंतरावर **A** फ्रेम खाली आणा व वरील पध्दती प्रमाणे दुस-या समपातळी रेषेची आखणी करा.
- अशा प्रकारे पूर्ण क्षेत्रात समपातळी रेषेची आखणी पूर्ण करा.

HOW TO USE GPS GARMIN

Note: when moving with pointer the message received is arriving destination and when moving with highway we get both messages that arriving destination and turn right or left.

Marking a waypoint:

1. Press and hold the **ENTER/MARK** key.

When the **ENTER/MARK** key is held down, the **MARK** function of the key is activated. The GPS 72 will capture its current location, and display the Mark Waypoint Page. By default, the unit will assign a square as the symbol, a number as the name, and the 'OK' Button will be highlighted. Pressing the **ENTER** key now would save the waypoint using the default name and symbol, but let's change them to something more meaningful.

Changing the symbol:

1. Using the **ROCKER** key, highlight the Symbol Field, then press **ENTER**.
2. Using the **ROCKER** key, highlight the 'Scenic Area' symbol, then press **ENTER**.

Changing the name:

1. Using the **ROCKER** key, highlight the Name Field then press the **ENTER** key.
2. Press the **ROCKER** key to the left, this will clear the name field.
3. Press the **ROCKER** key up, scroll through the alpha-numeric list until 'C' is selected.
4. Press the **ROCKER** key right to move to the next placeholder.
5. Press the **ROCKER** key down, scroll through the alpha-numeric list until 'R' is selected.

You should be starting to get the feel of it. Continue entering letters until you have spelled the word CREEK.

6. With the letter 'K' highlighted, press the **ENTER** key to accept the name.

You can enter any name that you like as long as it does not exceed ten characters, and does not duplicate a previously saved waypoint. When you have finished renaming the waypoint you will need to store it in the units' memory.

To store the waypoint:

1. Using the **ROCKER** key, highlight the 'OK' Button and press the **ENTER** key.

These are the same steps that you will use to enter names, change numbers and select options in all of the GPS 72 fields.

Here are a couple of tips:

- If you press and hold the **ROCKER** key while scrolling through the alpha-numeric list, it will move quickly.
- You can scroll through the alpha-numeric list in either direction.
- Don't press the **ENTER** key until you have finished entering the data. Remember, use the **ROCKER** key to move to the next placeholder.

DESIGNS AND DETAILS OF NALLA BUNDS

३. मोठे प्रवाह अवरोधक - प्रकार - ३

प्रमाण - १:२०

१. भाती, भूक, मुरमालीत चुदई ... $100 \times 2.54 \times 0.94 = 2.48$ ए.मि.
२. चुदई दगडी प्रवाह अवरोधक ... $100 \times \frac{2.54 + 0.50}{2} \times 9.40 = 98.20$ ए.मि.

नाल्या लव प्रक्षेप (PLAN)

प्रमाण १ से.मी = २ मि.

टिप्पणी व विनिर्देश (Specifications)

1. सध्या जमिनीची मोठया प्रमाणात धूप होत आहे. त्याचे कमीत कमी प्रमाण 1.80 घन मीटर प्रति हेक्टर प्रति वर्ष (25.73 घन फूट/एकर/वर्ष) इतके आहे. ही धूप थांबविण्यासाठी प्रवाह अवरोधक प्रस्तावित केलेले आहेत.
2. प्रवाह अवरोधक बांधावयाच्या नाल्यांना क्रमांक घ्यावेत. पहिल्या क्रमांकाच्या नाल्यावरील अवरोधकांना 1/1, 1/2, 1/3 प्रमाणे क्रमांक द्यावेत. दुस-या क्रमांकाच्या नाल्यावरील अवरोधकांना 2/1, 2/2, 2/3 प्रमाणे क्रमांक द्यावेत. त्याप्रमाणे मोजमाप पुस्तकात नोंद घ्यावी. तसेच ऑइल पेंटने प्रत्येक अवरोधकास जागेवर क्रमांक द्यावेत.
3. अवरोधकाकरिता जागा निवडण्यासाठी नाल्याच्या आरंभापासून सुरुवात करावी. गाळ साठण्यासाठी जेथे खोलगट भाग असेल ती नाल्यातील जागा जास्त योग्य लहान, मध्यम व मोठया अवरोधकासाठी 5 मी. 7.50 मि. 9 मि. पर्यंत गाळ साठू शकला पाहिजे. नाल्याची रुंदी 8 मि.पेक्षा जास्त नसावी.
4. अवरोधकाचे काम चालू करतांना नाल्याची काटकोणात खोदाई करावी. नाल्याच्या काठास दोन्ही टोके गेली पाहिजे.
5. नाल्याच्या पात्रातील आजुबाजूचे मोठे दगड (डबर) निवडून घ्यावेत. ओबडधोबड आकार असल्यास सुतकीने फोडून घ्यावेत. ठिसूळ किंवा गोल दगड वापरू नये. प्रत्येक दगड शक्यतो 15 सेंमी. जास्त आकाराचा व 30 सें.मी. पेक्षा जास्त लांबीचा असावा.
6. साठवलेल्या दगडातील सर्वात मोठया आकारमानाचे दगड पायात घट्ट बसवावेत. त्यासाठी चिपाचा /बारीक दगडाचा वापर करावा.
7. वरील बांधकामासाठी नाल्याच्या वरील बाजूस दोन भाग उंचीस एक भाग समपातळी असा उतार व नाल्याच्या खालच्या बाजूस 1 : 1 असा उतार द्यावा. प्रत्येक दगड उताराच्या काटकोनात पक्का बसला पाहिजे.
8. अवरोधकाच्या मधील बांधकामासाठीही दगडाचा उपयोग करावा. चिपा लावून सर्व दगड बैठकीवर अडक करून बसविले पाहिजे. संध्याची जाडी 2.5 पेक्षा जास्त नसावी.
9. अवरोधकाच्या सर्वात वरचे बांधकाम फरशी केल्याप्रमाणे उभे दगड रोवून अर्धवर्तुळाकार करावे. पृष्ठभागाचे दगड चिपाने घट्ट बसावे. यामूळे पूर आला तरी अवरोधकाचे दगड वाहून जाणार नाहीत.
10. जास्स बांधकामाची माहिती आहे, अशा लोकांनाचा प्रत्यक्ष बांधकाम करण्यास सांगावे. त्यांनी सुतकीचा वापरस करावा.

11. अवरोधकाचा एक दगड जरी सैल राहिला तर अवरोधक वाहून जाण्याची शक्यता आहे. तेव्हा प्रत्यक्ष बांधकाम करतांना सर्वतोपरी काळजी घ्यावी.
12. मजूरांना नाल्याच्या वरच्या बाजूस 1 फूट उंचीस 6 इंच व खालच्या बाजूस 1 फूट उंचीस 1 फूट असा अवरोधकास उतार द्यावयाचा आहे, हे वारंवार समजून सांगावे म्हणजे यात चूक होणार नाही.

APPENDIX No. XLIX

ECOLOGICAL INDEX

Ecological Index of a site gives us an idea as to the no. of plants which could be sustained per hectare on a particular site depending upon the various locality factor of the area and the value of 13.45 is taken as a standard for a site capable of sustaining 2500 seedling per ha. There is no need for planting more seedling per ha than those could be sustained on a particular site. The emphasis should be on growing the optimum no. of seedlings per ha which should grow into a healthy future stock with little mortality.

The Ecological Index for this area (Average) is 13.15 i.e 2444 say 2500 shall be Planted per ha in these areas.

Evapotranspiration of Gondia Station in year 2010

1. Range of maximum temperature (T_r)

Average : 44.5° C

2. Annual precipitation (P) = 1359.3 mm

3. Number of Rainy days (D) = 64 days

E_{pt} = Potential Evapotranspiration in mm = 148.66

$$\begin{aligned}\text{Ecological Index} &= (P \times D) / (T_r \times E_{pt}) \\ &= 1359.30 \times 64 / (44.5 \times 148.66) \\ &= 13.15\end{aligned}$$

Soil Type and Suitable Species

S. N.	Soil type	Suitable species
1	Sandy loam soil	Grewia, Ber, Kala Siris, Albizzia odoratisima, Tamarindus indica, Dalbergia sisoo, Pongamia pinnata, Anthocephalus kadamba, Ain, Shiwan, Teak.
2	Clayey Loam soil	Kala Siris, Dalbergia latifolia, Pterocarpus marsupium, Adina cordifolia, Mitragyna parviflora.

APPENDIX No. LIV

THINNING INSTRUCTIONS DATED 02-09-1993 & 02-06-2004

I. Revised Thinning Schedule :

(a) It has been decided to carry out thinning when the running age of the teak stand is a multiple of 5 years. As all the stands up to the age of 15 years have been thinned not more than once as per earlier instruction, the thinning to be done in the plantations in the 15th year of age (at the end of the growing season) shall be called second thinning. Accordingly third, fourth, fifth and sixth thinning would be carried out in 20th, 25th, 30th, and 35th, year of age respectively.

(b) In view of the previous instructions where second thinning was prescribed in the 8th year after first thinning, and the duration of first thinning in the plantation of the same year in a Project Division itself ranged from 8th year to 15th year of age the second thinning was required to be done over a period of 5 years in the ages ranging from 16th year to 21st year in different portions of the plantation of the same year. As a result, all subsequent thinning as well have to remain spread over a period of 5 years. This, indeed, complicates the process of monitoring of the execution of thinning works in field as well as the actual yield obtained at a particular age of the crop.

(c) Therefore, in order to rationalize the thinning regime, and to simplify the monitoring of yield actually obtained in various thinning, the second thinning proposed to be carried out in the 15th year of age shall be carried out irrespective of the age at which the crop was thinned first. This is to ensure that all subsequent thinning are carried out in one year only after a fixed interval of 5 years over the entire area of the plantation of the same year. Presuming that the first thinning was done in the age of 10 years, then the second thinning of 1982 plantation becomes due in the year 1999-2000 i.e. in the 18th year as per previous instructions, while second thinning of 1985 plantation becomes due during 1999-2000 as per these instructions. Since further delay in thinning the plantation of 1982, 1983 and 1984 is injurious to the crop, the work of second thinning in these plantations will have to be taken of during 1999-2000 only treating the same as "arrear" work. Thereafter, these plantations 1982, 1983 and 1984 would be worked in the years 2001-02, 2002-03 and 2003-04 for third thinning respectively when each of them becomes 20 years old. Although nothing much is expected to be available for removal specially from the plantation of 1982 and 1983 at the time of third thinning, but the enumeration figures and the data with regard to basal area and volume per ha collected in the 20th year (at the time of third thinning) is bound to give an idea whether the crop is developing in the right directions as a result of the treatment given at the time of second thinning as per these instructions.

(d) The revised schedule of thinning is given in Appendix-I. However the decision of rotation would be taken in near future.

II. Demarcation of the area:

Before commencing the works related to thinning, boundary of each section of the plantation shall be verified. Repairs of existing demarcations stones/marks shall be carried out, and if required, new boundary marks would be fixed as per standard practice.

III. Cleanings:

(a) A cleaning is an operation made in a young crop in order to remove any growth interfering with the proper developed of the principle species. As a result of long neglect in carrying out cleaning operation properly and timely in the past, if is noticed that meaning of 20-30 years old plantations are also infested with profuse growth of undesirable tolerant species both of seed and coppice origin. It is essential to remove this undergrowth for better aeration and also to facilitate the deposition of all accruable annual increment only on the potential individuals preferably selected from the planted crop. Therefore, cleanings to the extent necessary as may be determined by the Divisional Manager shall precede all thinning. Following rules must be follow in cleanings:-

- a. Tolerant species like Garadi capable of capturing the site shall be felled wherever found. Other inferior species including bamboo interfering or likely to interfere with the proper growth of teak shall be felled.
- b. Damaged or badly shaped trees of copies origin shall be cut back.
- c. Climber Cutting: Climber cutting is a work, which required to be carried out systematically, and shall be done prior to every thinning. Shall climber should is possible, be pulled up by the roots and large ones should be cut in two places, ones near the ground, and again at the height equal to breast height. Large creepers that trial along the ground, and the have thrown out roots, must be cut above and below in each point at which such roots exist; also, cut ends of large climbers should not be left lying in contact with the ground, as they are very liable then to throw out roots from the cut surface and so to continue growing.
- d. All subordinates should take every opportunity to cut climbers when met with. If the Divisional Manager observes climbers uncut, he will have reasons to consider that there is serious slackness in the Range.

IV. Stock Mapping and Demarcation of Site Quality-wise area on the ground :

(a) For species like teak in which there is a great difference between the rate of growth in different site quality, it is useful to make a stock map by site qualities so that different treatment is given to the plantation in different site qualities in order to get the best rate of growth in each quality class for this purpose, the area shall be traversed by the marking officer in parallel lines 20 meters apart and at every 20 meters distance along the line, height of dominant trees shall be estimated or calculated with help of FDCM Site Quality Meter (Teak) or any other instrument and recorded on the map 4 inch=1 mile scale (1:15840 scale) of the plantation (sketch of which on butter paper shall be with the officer in the field). The age of the plantation being known, site qualities shall be determined with the help of the table showing “top height by site quality and age” for each square and entered. The quality class boundaries shall then be drawn on the map, and demarcated on the ground accordingly by putting a coal tar band on breast height. While moving in the parallel lines, features like natural blanks, and presence of natural or planted bamboo should also be noted down and shown in the map. Details of signs and colours to be used for showing above mentioned features are given in Appendix-II.

(b) This exercise shall be done only once and shall remain. Valid throughout the life of the stand. All prescription related to future thinning shall be based upon these stock maps only.

V. Selection and Demarcation of Sample Plots.

Sample plots as per following rules shall be laid in each site quality area, and at least one sample plots shall be laid in every section of the plantation. It is hardly necessary to say that the sample plots should be as nearly as practicable a true representative of the crop. Hence, before selecting it, the officer should go over the whole crop, so that its average character may become clearly impressed upon his mind.

- (i) No sample plot shall be selected on the edge of the crop.
- (ii) On slopes presenting a wide range of elevation, or in crops offering a variety of aspects and soils, several sample plots judiciously distributed should be selected.
- (iii) The form of the sample plot should be along rectangle.
- (iv) The boundary of sample plot should be clearly marked by blessing the trees immediately outside, or by splashing them with white wash.
- (v) The aggregate area of the sample plots should be from 3 to 5% at least of the total area of the crop in the site quality class.
- (vi) As crops are young and more or less uniform having large number of stems per hectare a sample plot having an area of around 0.20 ha may suffice. However in old or mature crops, no sample plot should be less than 0.4 ha in extent, which as a general rule should be 1 to 1.5 ha.
- (vii) In the crops of large area, several plots of 0.2 to 0.4 ha each are preferable to a single large plot.

VI. Enumeration Survey of the Crop in the sample plots :

(a) The enumeration survey should be effected over successive narrow strips, each strip being gone over once and in a direction opposite to that in which the immediately preceding strip has been surveyed. On steep slopes it is convenient to run the strips horizontally and to begin at the bottom of the slope. The measurer equipped with tailor's tape shall call out the figures of over bark girth read which would at once be noted in the field book by recorder. As the survey progresses the trees measured are immediately marked with a clearly visible blaze, which should not, however, be deep enough to expose the wood. In order to make blaze, each measure should be provided with a light short handled axe. The blaze should be made on the site opposite the area still remaining to be surveyed, so that when the next strip is being surveyed the men can at once recognize up to what point the strip just completed extends. Trees should be given serial number on the blaze by pencil in the order in which the measurements are recorded. It must be borne in mind that enumeration in sample plots has to be done for the entire growing stock which also includes dead trees, all trees of copies origin and fruit trees etc. left un-felled at the time of clear-felling or which have come up subsequently. In short, no tree of the height above breast height should be left out or ignored in the enumeration.

- (b) By the method of point sampling, the existing average basal area per hectare in each sample plot shall also be measured by using a wedge prism of suitable Basal Area Factor(BAF). For our purpose, where we aim at reasonable accuracy, and also taking into account the convenience in the field a wedge prism of BAF-1 whose least count is 0.5 sq. m /ha should be used. After recording basal area per ha suitable number of points, average for the sample plot should be computed and recorded.
- (c) From of the field book given in Appendix-III shall be used for recording the measurements referred to in sub-para (a) and (b) above.
- (d) After recording the over bark girth measurements as above, sample plot wise abstract shall be prepared in Form 3 appended to these instructions.
- (e) It should be noted that abstract of enumeration in all the thinning areas shall be prepared in the girth classes starting from 0/10 cm, 10/15 cm, 15/25 cm, i.e. 45/60 cm, 60/75cm, 76/90cm, 90/105 cm. and so on till the girth of the largest tree measured is taken care of. Classification in these girth classes must be strictly adhered to as the Stand Tables have been re-casted according to these girth classes only.

VII. Computation of Actual Growing Stock and Application of yield and Stand Tables :

- (a) As for day-to-day works Quarter Girth Volume is used, the actual volume of the Growing Stock per hectare based on Quarter Girth formula shall now been computed with the help of the per hectare enumeration figures obtained from the measurements taken in the sample plots and the Local Volume Table (Quarter Girth) given in the working plan of the concerned Territorial Division. If Round Volume is given in the Working Plan, it should be ensured that the same is converted into Quarter Girth Volume before use. However in the absence of any reliable Local Volume Table, Following table showing quarter girth volume may be used. The volume indicated is the volume of stem timber (under bark) and that of small wood (over bark) measurement recorded inclusive of bark.

(b) Average basal area per hectare as computed in col.7 of item (8) of the Form 3 shall be compared with the figures contained in the yield table in respect of that site quality and age. If the actual basal area measured exceeds, then it would indicate need for thinning in the crop necessitating the removal of basal area to the extent the actual basal area exceeds the basal area given in the Yield Table. If it equals or falls short, then it would indicate that no thinning is needed in the crop.

(c) After applying the test as mentioned in sub-para above, if the crop needs thinning, then the thinning shall be carried out keeping in view the distribution of stems per hectare in various girth classes as contained in the Stand Table (Main Crop) for that particular site quality and age.

(d) For this, the figures from the yield Table and from the Stand Table in respect of relevant site quality and age shall be reproduced as provided in item (9) of Form 3, and girth class wise comparison of number of stems actually present with that required as per Stand Table shall be done. Following principle should be followed for taking decision as to how many stems in different girth classes would be retained after thinning in the crop.

(i) When in any girth class, actual population of stems is found to be equal or less than that given in Stand Table, no removal in that girth class shall be effected and all existing trees shall be retained irrespective of the fact whether they are of coppice origin or of inferior miscellaneous species. However dead and top broken trees shall be removed for they have special reasons.

(ii) If actual population of stems in a girth class is found to be more than that given in the Stand Table, the excess number of stems in that girth class are liable to be removed keeping the number of stems to be retained in that girth class equal to the population given in the Stand Table. However, if shortage of stems in next higher girth classes were found and as a result, less number off stems are being retained in those girth classes, the number of stems to be retained in this girth class shall be increased by the number it is falling short in the higher girth class. Thus, in short, total number of

stems per ha. to be retained shall be equal to that given in the stand table, (of course provided that the actual total population per ha. is more than that given in the Stand table), but the shortage, in higher girth classes shall be compensated by increasing equal number of stems in the lower girth classes where excess population was found there may be instance where although actual total population per ha. is more than that desired, shortage of stem is occurring in lower girth classes as well. In that case the shortage of lower girth classes shall be compensated by increasing the number in the next higher girth classes to that extent.

(iii) After it is decide, as to how many number of trees per ha to be retained and to be removed in different classes,

As all the teak plantation with the Company write from 1970 have been more or less regularly thinned though not according to the Yield Table, it should be safe to apply Yield Tables for their future thinning, even if the yield actually obtained would not match. However in case of such old plantation (like those raised by the forest department in the past and are in the position of the company) Which have not been regularly thinned, the application of Yield Table as such must be avoided. Such plantation would be thinned following entirely different procedure.

The marking for removal in that class shall be effected in the following order.

1. First, non-teak coppice shall be marked irrespective of species till all are marked.
2. Then teak copies shall be marked till all are marked.
3. Thereafter non-teak trees of seed origin shall be marked for felling. However trees of Shisam, Bija, Semal (of seed origin) shall not be marked for felling besides fruit bearing trees like Anwala, Mahua and Charoli etc. for any reason whatsoever. They shall be retained in excess of desired population of the growing stock.
4. Then teak trees of seed origin would be taken up for marking.

(iv) Keeping the principles as prescribed above in clause (i), (ii) & (iii), detailed instructions as to how many trees of teak, non-teak including coppice, if any, and teak coppice shall be marked for felling and how many trees would constitute the residual crop after thinning shall be respectively recorded in items 10 and 11 of Form 3, and communicated to the marking officer by the Divisional Manager in writing.

IX. Inspection of marking:

After the marking for thinning in the crop is over, the inspecting officer must measure the basal area per hectare (with the help of a wedge prism of BAF-1) of the crop by point sampling as if the trees marked are already felled. In other words, while measuring the basal area, the trees marked shall not be counted whether they fall in the category of “full tally” or “half tally”. If the basal area so measured is within around + or -0.5 Sq. Mt. Per ha. (i.e. equal to the least count of the wedge prism) of that given in the Yield Table for that particular site quality and age, then the marking done can be approved. If the basal area so measured exceeds 0.5 Sqm per ha, then some more marking of trees (to the extent basal area exceeds) will have to be done. If it falls short, then marking of trees (to the extent

basal areas falls short) will have to be cancelled. This will help in ensuring that the thinning are carried out as far as possible to the extent as provided in the Yield Table. Normally if the marking is correctly done, the residual basal area per hectare will automatically tally. However, as a result of retention of equal number of stems in lower classes in lieu of shortage in higher classes, the residual volume after thinning is likely to be less than that given in the Yield Table. Accordingly in such cases, the basal area of the residual crop is also likely to be less than that given with Yield Table. This has to be a normal feature and should not form basis for reducing the number of stems already decided to be removed.

X General:

- (a) The marking officer shall not be an officer below the rank of Range Forest Officer, and inspection officer shall not be an officer below the rank of Assistant Manager.
- (b) While marking trees, a blaze shall be made just above the breast height and a Serial Number be given at the time of recording the over bark girth. Marking hammer shall be stamped on the marked trees as may be directed by the Regional Manager. Thereafter, a geru band shall be given to all the marked trees at breast height.
- (c) No material shall be moved from the stump site without affixing mark of felling hammer on the stump as well as on the piece of timber on both out ends.
- (d) Divisional Manager and Regional Manager shall inspect at least 20% and 5% of the marked area in the Division and the Region respectively before the execution of felling works.
- (e) These instructions are not applicable to the Teak plantations raised without complete removal of over wood eg. Enrichment plantations, WLDP Teak Plantations over zone III area if under planted. FP I model under Maharashtra Forestry Project and old unattended Teak plantation raised by Forest Department.

XI. Maintenance of records:

Maintenance of records is a very essential part of Forest Management. This gives us a great deal of information to assess the impact of various treatments given to the crop in past which, in turn, helps in taking decision for its future management. In this regard following instructions should be followed.

- (a) Separate record shall be maintained for each year of plantation in a Project Division.
- (b) The records shall, inter-alia, be consist of the plantation:-
 - (i) Index Map showing location and extent of the plantation preferably in the scale of 1:50000.
 - (ii) Stock map by Site Quality as prepared vide para V (a) of these instructions Compartment and section boundaries shall be distinctly shown in the map.
 - (iii) Statement in Form 1 appended to these instructions showing section wise distribution of the plantations are into various site quality classes.
 - (iv) Information in respect of all clearings shall be maintained in Form 2 appended to these instructions.
 - (v) Section-Wise following information shall be maintained in Form 3 appended to these instructions which shall be for each of the site quality existing in the section.

- (1) Plot-Wise abstract of enumeration figures, quarter girth volume of the growing stock in the plot.
(item 7)
- (2) Abstract showing per hectare average of the enumeration figures (based on all the plots), volume of growing stock and basal area (item 8)
- (3) Per hectare Stand Table figures. (item 9)
- (4) Girth class wise number of stems per hectare proposed to be retained together with volume.
(item 10)
- (5) Girth class wise number of stems per hectare proposed to be retained together with volume.
(item 11)
- (6) Girth class wise number of stems proposed to be retained in the entire plantation as residual crop together with volume. (item 13)
- (vi) Control form shall be maintained in form 4 appended to these instructions.
- (vii) Statement of out turn shall be maintained in form 5 appended to these instructions.

XII. These instructions shall come into force from 1999-2000 working year and shall be applied in the field only after receipt of approval of the deviation proposals, arising out of these instructions, by the competent authority.

FOREST DEVELOPMENT CORPORATION OF MAHARASHTRA LIMITED, NAGPUR

Subject: Rotation period of teak in FDCM Limited.

The successful & established teak plantations with the FDCM Ltd. have been allocated to the teak production Working Circle/ Teak Plantation Management working circle in the management plans. Tending operations like cleaning & thinning have been prescribed therein as per revised thinning instructions conveyed vide this office letter No.PLN/5/F-iii dated 2/9/1999. Accordingly, after first thinning in the 10 years of plantations second & subsequent thinning are proposed at an interval of every five years. Further, in the Management Plans of some of the Forest Project Divisions the age of rotation indicated for Teak is 40 years based on the financial rotation.

In view of the fact that the Management Plans in FDCM Ltd. Are under revision, it was felt necessary to review the prescribed rotation period of Teak after taking into consideration the economics as well as silvicultural aspects and accordingly, a Committee was constituted vide letter No. PLN/11(2003-04) 3862 dated 29.11.2003 under the Chairmanship of Shri Tasneem Ahmad, Chief Conservator of Forest (Territorial) Amravati Circle. The Committee has submitted its report after analyzing the data of growth of Teak as well as the market trends in Teak over the last few years.

On the basis of the report of the Committee, the rotation period of Teak in FDCM Ltd is fixed at 80 years, irrespective of the site quality for Teak. This shall be applicable to all Teak plantations with the Company i.e. plantations raised by Forest Department prior to 1969, Teak plantations raised by FDCM Ltd. After clear felling upto 1987 and again after 2001 and plantations raised without clear felling including those raised under the scheme of Enrichment plantation, Wasteland Development Project (Bankable) Phase-I and FP-I model of Maharashtra Forestry Project.

Thinning would be carried in all these plantations as prescribed upto 70 year of plantation. No further thinning will be done in the plantation after 70 year thinning is done till it reaches 80 years of age when it would be ready for final felling. All efforts should be made to ensure complete protection of plantations from fire, grazing, illicit felling of trees etc till its final felling on completion of rotation period.

The schedule of cleaning, thinning and final felling due in Teak plantation in the next plan period up to 2015-16 is enclosed here with. It is requested that the same may be considered while revising the Management Plans of the respective Divisions. These instructions will be reviewed after ten years interval taking into consideration the relevant data at that point of time.

READ : 1. Government Resolution, Revenue and Forest Department, No. MFP
-1365/132211-Y, dated 6th December 1968.

2. Letter No. D/GRS/47¼/70-71½/5010 of 71-72, dated 17th November,
1971 from the Chief Conservator of Forests ,Maharashtra State, Poona.

RESOLUTION : In order to remove the disparity in regard to the procedure of cattle grazing with forest in the various regions of the State, a uniform grazing policy was evolved as laid down in Government Resolution referred to in the preamble. The grazing settlement work has been completed in some districts and the same is in progress in other districts. On completion of the work pertaining to the grazing settlement it would be necessary to have uniform procedure in regard to grazing. Government is accordingly pleased to prescribe accompaniment to this Resolution. The various forms which are to be used in connection with grazing are also appended to this Resolution.

2. The Director of Publicity should be requested to give wide publicity to the rules by issuing suitable press note.

**ACCOMPANIMENTS TO GOVERNMENT RESOLUTION,
REVENUE AND FORESTS DEPARTMENT
NO.MFP-1371'237035-Z, DATED THE 3RD NOVEMBER,1973.
GRAZING RULES FOR THE MAHARASHTRA STATE.**

I. GRAZING LICENCES

1. **GRAZING POLICY:-** Grazing Policy for the Maharashtra State is laid down in Government Resolution No.MFP-1365/132211--Y, dated 6th Decembe1968 given in Appendix-A.
2. **GRAZING DIVISION AND GRAZING UNITS:-**Each Forest Division will be a grazing Division. It shall be divided into grazing units under the orders of the Chief Conservator of Forests, Maharashtra State, Poona.
3. **VALIDITY AND DURATION OF LICENCES :** Grazing licences shall be valid for the grazing unit only, and shall cover a period not exceeding one forest year. All licences shall lapse on the last day, i.e. the 30th June of the Forest year for which they are issued.

Note: In exceptional circumstances the Divisional Forests Officer may permit cattle for which a pass has been taken for one unit to graze in another on the same licence without a fresh fee.

4. LICENCES TO WHOM GIVEN AND FOR WHAT AREAS AVAILABLE :

- I. All grazing in the forest (whether free or otherwise) should be on permit granted by the Forest Department. Grazing licence at prescribed rates will be issued to excess cattle of cultivator family and others and may be taken out for any grazing unit in a grazing division provided there is room in the grazing unit.

Note : The issue of licence is subject to such definite allotment of villages to particular grazing unit, to such limitation on the number of cattle to be grazed in any such unit as may have been ordered by Government after special enquiry, and also to such closure to grazing as may be enforced in accordance with the prescriptions of sanctioned working Plans.

- II. Grazing licenses for free grazing for cattle of cultivator family and others will be issued during the period from 15th June to 31st July only. From August 1st no grazing licence for free grazing will be issued, licences at prescribed rates only then be available and they will be issued by Round officers and Range Forest Officers. Provided that if the issue of licences for free grazing can not be completed by the end of July, and the Divisional Forest Officers is satisfied that there is good and sufficient reason, he may extend the period of issue to a date not later than August 20th. This power is to be exercised only in exceptional cases.
- III. A grazing license may be refused over a period of one year to any individual who has been guilty of persistent illicit grazing, on the order of the Conservator of Forests. Grazing licenses may be

refused over a like period in the case of communities whose members have been guilty of persistent illicit grazing, on the order of the Government.

5. The Divisional Forest Officer may from time to time, fix and alter sites for cattle camps in the forests. While fixing the sites the suggestions made by Grazing Settlement Officer will be taken into account. If such a site has been fixed in any forest, license, wishing to keep their cattle in such camps, shall utilize the site selected.

6. **CATTLE DUNITS :** The cattle units should be computed as follows :

a.	Adult buffalo	2 units.
b.	Adult cow, bull or bullock	1 unit.
c.	Buffalo calf under three years of age at the commencement	1 unit.
d.	Cow calf	1/2 unit.

7. **GRAZING CONCESSIONS AND RATES OF GRAZING FEE :-** Grazing units should be formed wherein specified number of animals should be permitted to graze.

Essential cattle, subject to a maximum of two plough units per cultivator family should be allowed free grazing in forests. Plough unit shall mean four cattle units computed in accordance with rule 6 above.

8. **GRAZING FEES :** Essential cattle exceeding the aforesaid limit for free grazing and all essential cattle should be charged grazing fees at the following rates :

a.	Adult buffalo	Fees per annum	Rs. 2/-
b.	Adult cow, bull or bullock	-do-	Rs. 1/-
c.	Buffalo calf (less than 3 years but more than 6 months old.)	-do-	Rs. 1/-
d.	Cow calf (less than 3 years but more than 6 months old)	-do-	Rs. 0.50

NOTE : Calves upto the age of 6 months should be exempted from the payment of grazing fees.

9. **CONDITION AS TO OWNERSHIP WHEN FREE AND ORDINARY RATES ARE ALLOWED :-** In all cases the concession of grazing cattle fee is subject to the condition that the animals to be so grazed are actually owned by the cultivator family.

10. **CERTIFICATE TO BE OBTAINED FROM PATWARI :** Any person who wished to obtain a licence for free grazing must obtain a certificate from the Patwari, Talathi, Gramsewak as provided for in rule 19.

11. **ADMISSION OF BUFFALOES AT FREE RATES :** Buffaloes may be included in the number of animals allowed by rule 7 to be grazed free only to the condition that the bulls, bullocks and cows owned by the cultivator family concerned shall be counted first against that number.

12. **ORDINARY RATES :** For all cattle, other than those admissible for free grazing, licenses shall be taken out at prescribed rates but no cattle owner is required to be taken out a license for more than the actual number of cattle he desires to graze in Government forests.

If a cattle owner wishes to graze his cattle in different herds, he shall be given separate licenses for each herd. The license, issuer should not compel cattle owner to obtain license for all the cattle owned by them as shown in the columns 4, 5, 6, 7, 8 & 9 of Patwari certificate but should, as soon as possible after the last August, report to the Range Officer the name of any person who takes out a pass for smaller number than the total owned.

13. **CALVES :** Calves less than six months old on 1st July of the Grazing year may graze free when accompanying other cattle which are being grazed under licence.

14. **FREE TRANSIT WITHIN GRAZING DIVISION :** Except in the case mentioned in the rule next following holders of licences are allowed a reasonable time for the passage of their cattle, free of charge, through every unit within the grazing division in which the owner resides, which they are obliged to traversed in order to reach that for which they have taken out grazing licenses.

Note : No transit pass, as described below, is required for cattle subject to this rule.

15. **TRANSIT :** A transit pass is required to be taken out for all cattle proceeding to graze in a Government forest outside the grazing division in which their owner resides, if on the way there, they are obliged to pass through Government forest and if owner has not previously taken out a license for the grazing division to which he is proceeding. If he has taken out a license before proceeding to the selected unit with his cattle the license can be produced as authority for passing through Government Forest in lieu of a transit pass.

Note 1 : All cattle proceeding to graze in a Government forest outside the grazing division in which their owner resides, are charged for at prescribed rates ¼see rule-8½. If the owner has not previously taken out a license for the grazing division to which he is proceeding, he must do as soon as the cattle reach the grazing division in which they are to be grazed.

Note 2 : When a cultivator (family who has not taken out a grazing license) wishes to graze his cattle in areas, other than Government forest while to reach such areas he is obliged to pass through Govt. forest he may be allowed transit passes at the discretion of the Divisional Forest Officer. In these cases the transit passes shall not be issued by licenced vendors but by Range officers and only on the definite order of the Divisional Forest Officer.

16. **ISSUE OF TRANSIT PASSES :** Transit passes shall be issued in the form of Appendix-C and at the rate of ten paise per animal for a period not exceeding one month, excluding calves (vide rule 13), and shall be subject to the condition that the cattle covered by the pass shall not stay more, than a reasonable time in each grazing unit which they are obliged to pass, and while passing

through any such unit shall be halted only at recognized forest paraos, at any one of which they shall not ordinarily halt for more than two nights.

Transit passes (Other than annual transit passes, vide rule 18) are valid only for the journey specified on the pass and must be given up on reaching destination.

Note : Should the journey occupy more than one month, a further monthly fee must be paid.

17. No transit pass shall be required for animals accompanying ordinary travelers, including cartmen.

18. TRANSIT PASSES FOR PROFESSIONAL CARRIERS AND CATTLE DEALERS :

Professional carriers and cattle dealers, such as Banjara, Hasdava, Kathewaris, Thelaris and Gawalis are allowed to take out transit passes under the conditions, detailed in rule 16, when journeying through Government forest. But person of this description, if they prefer, may take out annual transit passes in the form given in Appendix-D on payment of Rs. 2/- per buffalo, Rs. 1/- per bull, bullock, cow, horse or pony. Such annual passes, in addition to being transit passes, shall cover the grazing of the animals entered there in any one grazing unit while the pass holders are residents at their homes during the rainy season. The name and situation of such unit shall be specified on the pass.

II. PROCEDURE FOR GRANT OF LICENCES :

19. CERTIFICATE TO BE ISSUED BY PATWARIS/TALATHIS/GRAM SEVAKS TO APPLICANTS ENTITLED TO GRAZE THEIR

CATTLE FREE : The Patwari/Talathi/Gram Sewak shall issue the certificate on demand to all cultivator families within his jurisdiction, subject to any orders passed under sub rule

(ii) of rule 4 in the prescribed form in rule-22 and he shall be entitled to charge a waiting fee of 5 paise per certificate. Certificate may be obtained from the Patwaris/Talathis/Gram Sewak at any time from 1st to 31st May. The Patwari/Talathi/Gram Sewaks will not issue any certificate for the ensuing Grazing year after 31st May.

20. In case of loss of a certificate, a duplicate copy can be obtained from the Patwaris/ Talathis /Gram Sevaks concerned who shall be entitled to charge a waiting fee of 10 Paise for such copy. The word 'Duplicate' should be written across the copy by the Patwari/Talathi/Gram Sewak.

21. **NEW SETTLERS:** If a new settler wishes to obtain a certificate, the Patwari /Talathi/Gram Sewak shall prepare one for him after satisfying himself that he has taken up land for agricultural purposes. This certificate shall not be valid unless endorsed by the Revenue Inspector to the effect that the person to whom the certificate is given is a bonafide cultivator.

22. **PATWARI/TALATHI/GRAM SEVAK CERTIFICATE:** See Appendix No. E.

These certificate books shall be written by the Patwari/Talathi/Gram Sevak between 1st to 31st May. The Patwari/Talathi/Gram Sevak shall sign and date each certificate.

Part I of the certificate shall be retained in the certificate book by the Patwari/ Talathi/ Gram Sevak. Part II and III shall be given to the cultivator (families), and shall be presented by him to the licence vendor when he applies for a license.

23. CERTIFICATE HOLDERS ENTITLED TO LICENSE FOR FREE GRAZING : Subject to the provisions of rule 4 a cultivator (family) personally producing his certificate to a license vendor, shall be entitled to obtain a license for free grazing and at prescribed rate for such animal as are admissible under these rules.

Note : If the applicant is unable to appear in person, he should endorse the certificate, stating the number and kind of animal he wishes to graze.

24. LICENCES TO BE ISSUED BY FOREST LICENSE VENDORS : Licences will be issued in the form given in Appendix-E, they will be issued by License vendors persons authorized to issue license from 15th June to 31st July or such later date as the Divisional Forest Officer may order under the provision to rule 4 (ii) ; after this date they will be issued only by Range Officers and Round Officers.

25. HOW LICENSE VENDORS ARE TO DEAL WITH CERTIFICATE : The licence vendor shall sign and date both parts of each certificate presented to him by the cultivator, before he issues a licence for free grazing and shall attach part III of the certificate to the part of the licence, from that remains in his possession. Part II of the certificate shall be returned to the cultivator concerned.

26. INFORMATION TO BE SUPPLIED TO LICENCE VENDORS : Licence vendors shall be supplied with a list showing the allotment of Villages to particular Units in their own grazing divisions and the limits fixed as regards the numbers of cattle to be grazed in particular units, where any such allotment, or limitation has been order by the Government.

27. LOST GRAZING LICENCES : Licence holders can obtain copies if lost grazing licences by purchasing a 50 paise rated pass or remitting the amount in the treasury per copy from the Commission Vendor, and presenting it to the Range Forest Officer with an application. The later will issue a copy of the lost licence.

III. CHECK OF CERTIFICATES AND LICENCES :

28. CHECK OF CERTIFICATE BY REVENUE INSPECTORS : The Revenue Inspector/shall check the entries in Part of the certificate book but shall in no case call cultivators away from their villages for this purpose. Ordinarily the Revenue Inspector shall check at least 50% of the entries in column 3 to 9 with the aid of the latest Titamma milan khasra or village Form

No. -15, but the Collector may, in consultation with the Divisional Forest Officer reduce the standard wherever advisable.

29. CHECK OF CERTIFICATES BY THE SUPERINTENDENT OF LAND RECORDS :

The Superintendent of Land Records and his Assistant shall make it a point of touring during June and July and checking as such as possible of the work of Patwaris/Talathis/Gram Sevaks and Revenue Inspectors under these rules.

30. CERTIFICATE BOOKS AFTER CHECK TO BE SENT TO THE

DIVISIONAL FOREST OFFICER: On the 1st August the Patwari/Talathi/Gram Sevak shall send Part I of the certificate book to the Revenue Inspector who shall, there upon, forward it to the Divisional Forest Officer for comparison with the Part-III (see rule 31). Should the Divisional Forest Officer find any discrepancies between Part-I and Part-III he shall report to the Collector for necessary action.

31. LICENCE VENDORS TO FORWARD COUNTERFOILS TO THE DIVISIONAL

FOREST OFFICER: The licence Vendors shall forward to the Divisional Forest Officer the counterfoils of the licenses issued by them with Part-III of the certificates attached vide rule-25.

32. CERTIFICATE AND LICENCES TO BE PRODUCED ON DEMAND :

The Range Forest Officer or any Forest official authorised by him may call on the Patwari/ Talathi/ Gram Sevak or cultivator to show him the Parts of the certificates, licenses and transit passes in his possession.

33. CHECK BY FOREST DEPARTMENT :

The Divisional Forest Officer or Range Officer when touring through a Patwari's/Talathi's/Gram Sevak's circle may call on the Patwari to produce the Titamma milan Kshasara or the village Form No.-15 for the purposes of check, but Patwari's shall on no account be called away from their circles for this purpose.

IV. INSTRUCTIONS FOR THE COLLECTION AND REMITTANCE OF GRAZING REVENUE :

34. Grazing revenue shall be collected in cash paid for grazing licences. The agency employed for issuing grazing licences for cattle grazing in Government Forests will mainly be the same as that employed for sale of rated passes for forest produce. Commission Vendor shall ordinarily be paid a commission of 10 paise for each rupee of grazing revenue collected by them provided that the Conservator of Forest may, for reasons to be recorded in writing, fix the rate of discount to a figure not exceeding 30 paise in a rupee. Such sanction shall hold good for a period of not more than 12 months at a time from the date of its grant and shall be subject to revision each year. The grazing year for which licences shall be valid shall commence on the 1st July and end of the 30th June.

Note : Whenever possible Gram Panchayat will be appointed as Vendor.

35. The officer shall by the end of April every year, report to the Divisional Forest Officer whether the number of Commission Vendors in his range is adequate, and whether all the vendors are efficient enough to carry on the work of issuing grazing licenses if he requires any additional vendors from the permanent forest establishment. The Divisional Forest Officer shall then proceed on the recommendation of the Range Officer to appoint a license issuer either a Commission Vendor or Round Officer, for each grazing unit.

36. Each grazing unit and the village served by it shall constitute a Grazing Circle. For each such circle a headquarter shall be fixed where the license vendor shall ordinarily reside. Each circle shall further be sub-divided into a convenient number of Sub-circles and a centrally situated village shall be fixed for each sub-circle at which license shall be issued for the Sub-circle. Such sub-division shall be approved by Divisional Forest Officer and shall remain in force until altered by a special order of that Officer, who shall also fix the dates for the issue of licences at the headquarter of each sub-circle shall be formed to prevent any owner of cattle from having to go more than 6 Km. For his licence. A list of such dates shall be published by 15th May in all the villages concerned through the Patwaris and village Kotwals. Three to four days should ordinarily be allotted for the issue of license for each Sub-circle. Commencing from the 15th June the license issuer shall visit each sub-circle headquarter in turn and issue at each licenses for the village allotted to the sub-circle. During at least the last week of July he shall be present at the headquarter of the circle for the issue of licenses for the whole circle.

37. Every licence issuer shall be personally responsible for all forest revenue collected by him. No license issuer shall, without special reason to be reported in writing with his next remittance, retain a cash balance on account of forest revenue exceeding the amount of security furnished by him.

38. The Range Officer shall arrange to have all grazing revenue collected by licence issuers in his range remitted into the treasury or sub-treasury promptly. For this purpose he should arrange to have the money brought to him by members of the forest staff who have furnished adequate security. The Range Officer will remit the revenue from time to time to the Treasury under a treasury challan, as in the case of other forest revenue.

39. Grazing license book shall be kept under lock and key in the custody of the license clerk in Divisional Forest Officer or his Gazetted Assistant. The divisional Forest Assistant or his Gazetted assistant must, however, check the stock himself before the grazing license book are issued to the Range Officer in the middle of May and again immediately after all the unused and partly used grazing license books are returned to the Divisional Forest Officer as prescribed in rule 47. Each grazing license form shall bear a rubber stamp impression showing the year and the name of the Division for which it is valid. Before making a Range Office inspection the Divisional Forest

Officer shall obtain from his stock register, an abstract of the grazing license books issued to the Range and check this carefully with the Range Stock Register and verify the entries in that register.

40. During the time of issue of grazing licences the Range Officer and his Round Officers should constantly tour in their respective charges, paying surprise visits to issuing stations as often as possible and checking the work only. Such tours will enable the Range Officer and Round Officer to hear and promptly redress the cattle owner's grievances and also to detect and prevent corruption and will facilitate the safe transmission of grazing revenue as provided above.

41. The license issuer shall maintain a separate grazing cash book (Form IX-A-27), in which he shall enter all grazing licenses issued by him. This form shall be filled in daily and the totals of different columns entered daily. Separate forms shall be used for different units, if the same license issuer issues licenses for more than one unit.

42. As soon as possible after the 1st August, the Range Officer should check the grazing book of each of his license issuer with the licenses issued by him and tally the amount of the revenue recovered with the treasury challan. This check should be very elaborate. Each license should be checked with the Patwari certificates also with the entry in the grazing cash book. The rate should also be checked. An abstract of the total number of cattle for which licenses have been issued should be prepared village by village and unit by unit, the figures compared with those of the previous year and all fluctuations explained. Those abstracts should be submitted to the Divisional Forest Officers by the end of August, at the latest.

After the check is completed the Range Officer should recover all counterfoils of used license books, all unused and partly used books and the grazing cash book and deposit them in his office untill they are sent to the Divisional Officer as prescribed in rule 47.

43. After the 31st July, the Range Officer shall arrange for the check of the cattle in the forest by the Round Officers and if necessary, senior literate Forest Guards. The check should be completed by the middle of September, at the latest. The Range Officer should also furnish each checking officer with a list of cattle owner's who obtained licenses for a smaller number of cattle than that owned by them. He should closely participate in the work of checking.

44. The Divisional Forest Officer may temporarily transfer special duty staff from charges during the period of checking set out in rule 43.

45. The Checking Officer should check the number of cattle actually grazing in the forests with the number entered in the license, verify the entries in the license with those in the Patwari /Talathi/ Gram Sewak certificate and check the rates of grazing duty recovered. In the case of cattle not recovered by licenses, he should submit usual offence report to the Range Forest Officer and he should also report any discrepancies in the licenses. In token of having checked the cattle he should sign and date both the second and third parts of the licenses produced by the graziers,

noting there on any discrepancies discovered, and take away with him the third part of the license, returning the second part and the Patwari/Talathi/Gram Sewak certificate of the grazier. The percentage of checking of grazing licenses and collection of the third parts in the forests should at least be 75 per cent.

46. If a grazier is in charge of cattle of more than one owner, it is not sufficient to check the total number of cattle found grazing with the total number entered in all the licenses taken together. The grazier should be made to state the number of cattle of each owner found grazing that day and each such number actually grazing is in excess of that entered in the license of an owner, the excess number should be created as not covered by license, though the total number in the herd may tally with or is found to be even less than the total entered in all the licenses taken together.

47. The checking officer shall prepare a list of all the third part of license recovered by him and send the list, together with the third parts, to the Range Forest immediately. On receipt of the third part in the Range Office the Range Clerk should paste each of them on the corresponding counterfoil and check at least 50%, of such counter foil, bringing any discrepancies or irregularities discovered by him during the course of check to the notice of Range Officer. The checking and pasting of the counterfoils should be completed by the Range Clerk at the latest by the end of November. While the Range Clerk is checking and pasting the third parts, the Range Officer should scrutinize his work by checking at least 5% of the third part of the license himself.

When all the third parts of the licenses recovered have been checked and pasted and not later than the 31st December in any case, the counterfoils of grazing license books together with all the unused and partly used books shall be sent to the Division Office for further checking.

At least 50% of the counterfoils should be checked in the Divisional Office by the clerk concerned and 5 per cent, by a Gazetted Officer.

Before these are submitted, a limited number of license books will be sent to the Range Officers and Round Officers for the issue of licenses during the remainder of the year. All such books, whether used or unused, will again be returned to the Division Office after receipt in the Range Offices of the new stock of books in May. It is essential that on receipt in the Division Office all books, whether used or unused, should be checked with the stock register to ensure that none have been kept back by the Range Officer.

GRAZING POLICY
GOVERNMENT OF MAHARASHTRA
Revenue and Forest Department,
Resolution No. MFP-1365/132211-Y
Sachivalaya, Bombay-32 (BR), dated 6th December, 1968.

RESOLUTION

1. Different sets of rules regarding grazing in Government Forests are at present prevalent in the three regions of this State, viz. Western Madharashtra, Vidarbha and Marathwada. This disparity needs to be set right. Further, the Government of India, has in its National Forest Policy Resolution laid down certain guide-lines for formulation of the grazing policy by the State Government. Accordingly, a grazing policy in consonance with these guidelines need to be evolved for uniform application throughout Maharashtra. Such a policy must have the ultimate aim of providing ideal pasturage within the resources available in the State Forests without letting the resource itself to impair and deteriorate. It has further to be based on sound principles of forestry. The entire question have been engaging the attention of Government for some time past. It was also referred to the State Forest Advisory Committee for its advice.
2. After examining the question in all its aspects and also taking into consideration the views unanimously expressed by the State Forest Advisory Committee, Government is pleased to direct that the grazing rules as set out in the Annexure to this Government Resolution should be made applicable throughout the State of Maharashtra.
3. In the Vidarbha region of the State where grazing settlement have already been made, the rules contained in the annexure to this Govt. Resolution should be made applicable from the 1st July 1969, when the next grazing year will commence. In the remaining areas these rules should be enforced as and when grazing settlements are made. These settlements should be undertaken in stages. The areas containing fairly good forests which are in danger of destruction due to uncontrolled grazing should be selected first for the settlement work. The selection of the areas should also be so made as to be able to demonstrate, within a responsible short period how the forest in these areas could be developed with control grazing. The work of carrying out grazing settlement should be undertaken in Thane, Nashik, Dhule, Jalgaon and Nanded districts in the instance first.
4. This Government Resolution issues with the concurrence of Finance Department vide its un-official reference No. 17567/3258-III, dated the 4th November, 1968.

By order and in the Name of the Governor of Maharashtra,

Sd/- A.J. PALIMKAR

Under Secretary to Government.

**ACCOMPANIMENT TO GOVERNMENT RESOLUTION, REVENUE AND FORESTS
DEPARTMENT, NO. MFP-1365/132211-Y, DATED THE 6TH DECEMBER 1968.
GRAZING RULES FOR FOREST AREAS IN MAHARASHTRA STATE**

In areas where no Grazing Settlements have so far been carried out, such settlements should first be undertaken for the purpose of classifying various forest areas on a functional basis and fixing the maximum grazing incidence for each category as indicated below :

- a) **PROTECTED FORESTS** : This category will include steep and precipitous forests especially those in the catchment areas of important river valley projects and also the denuded lands which are in the dire need of soil conservation and afforestation, Grazing should be altogether prohibited in these forests save in exceptional cases, when too the incidence should not exceed one cattle unit for 10 acres (A cattle unit is defined in para (2) below).
- b) **TREE FORESTS** : This category will include forests where production of timber is the main object of management. The grazing incidence for these forests should be one cattle unit for 3 acres.
- c) **MINOR FORESTS** : This category will comprise forests in which production of firewood on a sustained basis is the prime object of management. The grazing incidence for these forests should be one cattle unit for 1.5 to 2 acres.
- d) **PASTURE LANDS** : This category will include openly stocked forests or lands that have ceased to yield even small timber but which are conveniently situated for providing grazing to the adjoining cattle population. The grazing incidence for these lands should one cattle unit per acre.
- e) **GRASS RESERVES** : This category will include all Forest areas set apart for the production of good fodder grass. Grazing should be completely eliminated from these areas, but cutting of grass may be permitted according to Rules.

1. The cattle units should be computed as follows :-

a.	Adult buffallow	2 units.
b.	Adult cow, bull or bullock	1 unit.
c.	Buffallow calf under three years of age at the commencement	1 unit.
d.	Cow calf	1/2 unit.

2. Grazing units should be formed wherein a specified number of animals should be permitted to graze.

Essential cattle, subject to maximum of two plough units per cultivator family should be allowed free grazing in forests. A plough unit shall mean four cattle units computed in accordance with para 2 above.

3. Essential cattle exceeding the aforesaid limit for free grazing and all non essential cattle should be charged fees at the following rates :

a.	Adult buffallow	Fees per annum	Rs. 2/-
b.	Adult cow, bull or bullock	-do-	Rs. 1/-
c.	Buffalo calf (less than 3 years but more than 6 months old.)	-do-	Rs. 1/-
d.	Cow calf (less than 3 years but more than 6 months old)	-do-	Rs. 0.50

Note :- Animals upto the age of 6 months should be exempted from the payment of grazing fees.

4. The villages should be listed under each grazing unit to ensure equitable distribution within permissible limits of the number of cattle that may graze, where demand for grazing priorities to be laid down.
5. In any case, cattle cover and above the carrying capacity of a grazing unit, should not be allowed to graze in the unit.
6. All grazing in the forests (whether free or otherwise) should be on permits granted by the Forests Department. Penal action ¹/₄ such as impounding of cattle/or prosecution ¹/₂ should be taken unauthorized graziers. Grazing in the forests by goats should be prohibited altogether. For sheep grazing and rate of grazing and rate of fees shall be fixed after obtaining Government approval.
7. The Forest areas should be closed to grazing according to silvicultural requirement under the provisions of sanctioned working plans. Monsoon and rotational closures should be provided in heavily grazed units and in area susceptible to erosion. Special closures for specified period may also be enforced for the implementation of special schemes of the Forest Department. Fodder areas required for fodder Banks should be closed to grazing.

APPENDIX No. LXLIII

STANDING ORDER 001

FROM PRINCIPAL CHIEF CONSERVATOR OF FORESTS

(WILDLIFE) MAHARASHTRA STATE, NAGPUR

Issued on 07.03.2003

Measures for protection of wildlife outside the protected areas.

Geographical area of Maharashtra State is 307 lakh ha. Out of this 63 lakh hectares are under forests cover. These forests are under the control of the Revenue and Forests Departments to the extent of 8 lakh and 55 lakh ha respectively. Various wild animal species exist in these forests and also outside. Depletion of forests has created a major problem related to wild animal habitat and protection like increase in wildlife poaching and illegal trade/smuggling. Sanctuaries and National Park are established to provide protection to wildlife. In all 35 sanctuaries and 5 National parks which includes 3 tiger projects are established in the state of Maharashtra. (The list is given at appendix I) The area thus formed as protected area (PA) is 7 lakh ha. Apart from this, area formed as Great Indian Bustard (GIB) sanctuary is 8 lakh ha. There is a separate wing under forest department to manage these PA's in the national level wildlife estimation (Census), year 2001, it is revealed that wildlife population especially that of tiger in the Non PA areas is declining steadily every year. If proper measures are not taken then tiger and other wild animal species will become extinct, causing a serious environmental crisis which in turn will affect the quality of the existing forests and their conservation in general.

The main reason behind this depletion in wildlife population in these areas, is lack of proper protection as well as lack of enough measures and initiative to conserve their habitat and surrounding. The way wild life habitat and water hole development is looked after in PA's is not looked as well in non-PA areas. In non-PA areas wildlife is facing poaching, habitat destruction and fodder and water shortages, which causes a serious threat to their breeding and conservation. Illegal poaching and insufficient breeding, results in faster depletion of population than expected. In these circumstances, we need to act urgently to protect forests and wildlife so as to check environmental degradation. Conservators, Deputy Conservators and Assistant Conservators of Wildlife wing will assist, co-operate and guide the territorial staff (officers and other employees) technically to save wildlife and its habitat in the areas outside PAs.

Tiger, which is the symbol of safe and healthy environment, it at the apex in the food pyramid and hence it is utmost important to protect it for the continuance of life on mother earth. In Maharashtra during the All India Estimation of Tigers in 2001, the total of 238 tigers were recorded. The population of tiger is stable in the PA's for last 8 to 10 years but it is not so outside. Hence it is the need of the hour to concentrate on the protection of tigers in these areas.

The officers/employees working for the cause of forests conservation out side the PAs such as those working for Forest Department (territorial), Social Forestry and Forest Development Corporation cannot pay special attention for the protection and conservation of wildlife. In this regard Chief Conservator of Forests (WL) has issued suitable instructions through his letter No. Desk- 23(6)/190 dated 25/4/2001 and copy of which is given in the Appendix no. 2.

Under the wildlife (Protection) Act 1972, the state government delegated vide its letter No. Desk 22 (A)(4)/C.No.117/1180 dated 23.9.1993 certain powers to forest officers at all levels for the protection of wildlife and to take appropriate measures for anti poaching. The Chief Conservator Forest (WL) vide his letter No. Desk-23(3)/2899 dated 25-1-2002 had prescribed measures to control crop damage by wild boars.

For effective wildlife protection and conservation in non PA areas, the following consolidated standing orders are issued for immediate implementation.

1.0 Establishing secret information network for wildlife protection

It is most important for all forest officers to establish informer networks at their level to prevent and investigate into offences related to wildlife. Local villagers, vanmajurs and Forest Guards are generally aware of all activities in their areas. Senior officers should interact more with local staff and villagers and solicit important information from them. They should also offer suitable rewards to the officers and staff who excel in curbing illegal poaching and trade in wildlife. A note of such work should be taken in their service books.

Territorial forest officers are hereby instructed to implement the following protection and anti-poaching measures in the areas under their jurisdictions.

1.01 All the forest officers, right from forest guard onward will remain always alert in their daily duties regarding wildlife protection and conservation.

1.02 The concerned Deputy Conservator of Forests will prepare an annual plan for such areas including budgetary provisions. They will also inform their higher officers immediately about illegal hunting and other incidences.

1.03 The above measures include following items.

A) Measures to be taken by the Forest Guard : Forest Guard is an important institution of wildlife protection. Obtaining all preliminary information about wildlife related information/offences from him and following them up well help to control wildlife offences.

The forest guard should therefore –

- 1) Always move around and acquaint himself thoroughly with the entire area including wildlife habitats and water holes under his jurisdiction.
- 2) Get conversant with all important wildlife species found in his beat. He must gather information about location and movement of wild animals by moving around in the beat and also by soliciting information from locals.
- 3) Since poaching by tapping electric transmission lines passing through the forests is on the rise, the Forest Guard must inspect the lines regularly, to prevent poaching by electrocution also to avoid accidentally touching them while at night.

B) Measures to be taken by the Forester

Supervise the Forest Guards regarding performance of duties as prescribed above.

- 1) Keep record of all water bodies especially those water holes, which hold water even during acute scarcity period and depict them on a suitable map of his Round
- 2) Regularly inspect all these water holes and ensure that miscreants do not poison them.
- 3) Take up night patrolling along with the Forest Guards and their assistants.
- 4) Report all cases of cattle kills and human loss due to wild to higher officers within 12 hours.
- 5) Take precaution that the carcass of dead cattle is not poisoned
- 6) Keep record of all weapon holders in his jurisdiction.

C) Measures to be taken by Range Forest Officer.

- 1) Take regular review of all the measures taken by foresters and forest guards under his control.
- 2) Earmark sensitive zones on his range map, which will include details like an electric transmission lines, areas of abundant wild animals, location of licensed weapon holders etc.
- 3) Ensure that the Foresters/Forest Guards regularly patrol the sensitive area and also obtain Beat “Khariyat” report. The report will include information on movement of wild animals especially that of tigers and panthers.
- 4) Regularly visit and if required, stay overnight at the beat headquarters and keep contact with the locals and thereby build his own secret network.
- 5) Deal promptly in cases of cattle kills by wild animals to compensate their owners expeditiously.

- 6) Ensure that no illegal sale of wild animal meat is carried out, specially in weekly bazaars and he must obtain regular reports of the same from his subordinates.
- 7) Ensure that there is no illegal collection of tendu leaves from PAs and there surrounds (3 kms) and see that legal action is initiated against the concerned, including the contractors accepting such tendu leaves.

D) Measures to be take by Assistant Conservator of Forests

- 1) Regularly obtain reports regarding wildlife protection from their forest guards/forester and RFOs, and through surprise checks ensure all his subordinate staff are carrying out their duties as prescribed.
- 2) Regularly patrol the sensitive areas under his jurisdiction with local staff and monitor the movements of suspicious offenders.
- 3) Supervise and ensure that fire protection measures are carried out timely and effectively.
- 4) Powers to enquire in to the offences related to wildlife are vested with Assistant Conservator of Forests. Therefore he should pay proper attention to every enquiry and ensure that self contained and water tiger complaints are filed in the Court. He should submit regular review of all the court cases to his Deputy Conservator of Forests/Conservator of Forests. He also must ensure that all the witnesses attend their cases timely. If this is not happening then he should report the matter to the Hon. court.

1.4) The Government vide its order No. Desk-22(D)(1)/C.No.117/1180 dated 23-9-1993 delegated certain powers to forest officers under WPA 1972. A copy of the same is enclosed as appendix b. Some of the important sections and powers delegated under them are given below.

Sr. No.	Section of the Act.	Extent of power	To whom delegated
1	11(1)(b)	Power to grant permission to hunt a wild animal other than schedule 1, which has become dangerous to human life or to properly.	Addl. CWLW, Dy. CWLW
2	39(2)	Power to receive the report of and to take over possession of Govt. property.	Addl. CWLW, Dy. CWLW, Wildlife wardens and Asst. Wildlife Wardens.
3	40(1)	Power to receive declaration by a perion in control, custody or possession of any captive animal specified in sch. 1 or part II of sch- II.	Addl. CWLW, Dy. CWLW

4	41(1)	Power to enter upon the premises to make enquiries, prepare inventories of animal articles etc. and to affix identification mark etc.	Addl. CWLW/ Deputy CWLW/ /W.L.W/ Asst. WLW
5	50(1)(3)	Power to enter upon and search any premises and search any vehicle etc. and to seize etc.	Addl. CWLW/ Deputy CWLW/ W.L.W/Asst WLW
6	54	Power to compound offences	Addl.CWLW/ Deputy CWLW/
7	55	Power to make complaint to the court	Addl. CWLW/ Deputy LW/ W.L.W/Asst. WLW/ Honorary WLW

Deputy Conservator of Forests should regularly monitor works of forest guard / forester /RFO's and check their wildlife related records.

1.5) Wild animals sometimes do venture in to the villages surrounding from forests and thereby come in contact with villagers. Villagers residing in the forest look at these animals with fearful reverence. Therefore it is essential to keep thee villagers educated about wildlife through leaflets, video cassettes and through direct meetings. It is the duty of all to crease sympathy among the masses for wildlife and to convince them about the need to balance the environment through conservation of wildlife. An important target should be a school student. Normally workshops/seminars/educational tours are conducted in PA areas for staff as well as locals but in non-PA areas it is not so arranged. Therefore Deputy Conservator of Forests/Conservator of Forests (territorial) must look into specifically and see that minimum of 2 education tours/ workshops will be held for forest guard/forester/village protection committee and locals in every range and every year. The cooperation of wildlife wing may be taken. They should include this in APO and budget and implement the same.

1.6) Considering gradual decrease in the wildlife population the Deputy Conservator of Forest / Conservator of Forests (territorial) will identify areas, where endangered and schedule I species such as the tiger, panther, bear, wild dog are normally found and take shelter, and use as breeding grounds. Such area should be declared as "sensitive areas". The Conservators /Deputy Conservators will prepare annually operation plan and make budgetary provisions for the measures proposed to be carried out in such areas and ensue that these are effectively implemented. The measures shall include following three points.

- 1) A division level critical report for sensitive area shall be prepared mentioning population of existing wild animals, their status and whether they are on the verge of extinction at local as well as state levels.
- 2) The information about the sensitive area is to be gathered and shown on each Range map depicting the animal's habitat, breeding grounds, movements area (corridors) etc. The perceptible threats to their survival must also be identified and measures to be implemented to overcome these.
- 3) The information about the availability of water and fodder in the area should be collected and measures must be implemented to overcome the limiting factor regarding it.

An action plan thus prepared at the division level must be implemented and the implementation of it must be reviewed regularly at the Conservator of Forest's level. This will take care of the conservation, breeding and protection of wildlife and will help to restore their population and stabilize the population.

1.7) Sheet performers (madaris) earn their livelihood by displaying bears, monkeys, snakes and mongoose and for this purpose they are subjected to cruelty. Wild animals are ill-treated during their training. Hence the Central Government has banned all such performances by lions, tiger, panther, bears and monkeys. The legal action shall be initiated wherever violation of the said order is observed.

1.8) Some animals like deer, mongoose, hare birds, snakes and in some exceptional cases predators like panther and tiger are kept in captivity without legal permission. An offence must be booked in such cases. Hunting of all wild animals is prohibited under WPA 1972 and it is a cognizable offence. This information must be explained to all.

2.0 **Keeping track of wild animals movement**

Wild animals move inside or even outside the forests, Local staff should keep a track of movement of these wild animals. Specially tiger, panther and black buck. Wild animals stray outside the forests specially in rainy and summer seasons and it is observed that during this season, they are likely to get hunted/poached. During this season forest staff should keep a track of their movement and take care that nothing untoward happens to them by the miscreants. It also should be borne in mind that the miscreant does not use this information.

3.0 **Help of the local forest protection committees.**

As number of local forest protection committees has been established. They can actually help in a coordinated manner to collect information about animals found outside the

boundary of NP and sanctuaries. In many cases they stray out of these borders and some times get killed. The forest staff from such areas shall collect such information from these forest protection committees (F.P.C's) and this may be incorporated in their main objectives, if required.

3.01) **Wild Animal Protection Committee.**

Many species of wild animals are found in surrounding forests of NP and sanctuaries. In the adjoining villages where "Joint Forest Management Committees" have been established, a subcommittee for the protection of wild animals will be established. It is expected that there will be 3000 such sub-committees and wildlife conservation and protection will be the main objectives of these sub-committees. The proposal may be submitted to utilize the funds for the development through central Government's Eco-development schemes.

4.0) **Illegal Trade in Wildlife**

It was revealed during the review of pending wildlife related court cases that a large number of wildlife offence cases are detected, booked and filed in the various courts but are not monitored regularly in the courts which result in the acquittal of offenders. Therefore all court cases must be monitored regularly. Every forest divisions must prepare a list of accused and suspicious offenders. A list with photographs of all the habitual offenders must be maintained and kept in range offices.

4.01) Trading and even export of deer and sambar shed antlers was going on till the year 1998. Government of India Commerce ministry's resolution dated 4.8.1998 has prohibited export-import of the shed antlers. It has also banned export of peacock feathers, but dealing in peacock feathers in the domestic market has not been effected. In this regard Conservator of Forest's/Deputy Conservator of Forest's/RFO's shall ensure proper implementation of these orders.

5.0) **Man-Animal Conflict.**

It is utmost important to balance the environment through wildlife protection. According to National Forest Policy 33% area should be under forest cover and it is essential to keep maximum area of this as PA. The ever decreasing forest cover and ever increasing people's demand does not go hand in hand, which leads to tussle between wildlife and local community. The population of wild animals is on the rise in PA's due to protection they get, whereas herbivores are increasingly raiding the adjoining fields and cause severe crop damage. Forest departmental has received number of applications in this regard. Hence the government took cognizance and has set up a secretary level committee under the chairmanship of Chief Secretary. The committee has taken following three decisions.

- 1) Insurance against crop damage.
- 2) Raising stonewall between fields and forest to prevent crop-damage.
- 3) Hunting wild pigs, if it is unavoidable.

Out of above decisions, insurance against crop damage is pending for finally decision at Govt. level, whereas other two are finally decided. Constructing stone wall against crop damage is to be taken up under EGS. The estimates of these works shall be sanctioned through concerned District Collectors. This office has issued detailed instructions vide letter No. Desk-23(3)/Secretary level /2899 Dated- 25.1.2002 for hunting of wild pigs.

These instructions are to be followed and implemented.

6.0 Appointment of Honorary Wild Life Wardens and their duties.

Honorary wild life Wardens have been appointed for each district as per section 4 (1)(bb) of WPA 1972. They have been delegated to use powers of sections 55 vide Govt. Resolution dated 27/9/2002 honorary wildlife Wardens are expected to perform following duties.

1. Control poaching and clandestine trades in wild animals and products / articles thereof.
2. Identify and select the areas suitable to be declared as sanctuaries, National Park for proper Conservation and Protection and Wildlife.
3. Prevent damages to Wildlife habitats.
4. Take appropriate measures against damage by wild animals to life and economy.
5. Carry the message of conservation to the people and enlist public support for nature and wildlife conservation.
6. Participate in any other matter related to protection of wildlife which may be entrusted by the wildlife Advisory Board are CWLW of the state from time to time it is essential to enlighten and create awareness in the public about nature and wildlife conservation. He is deemed to be a public servant within the meaning of the section 21 of Indian panel code and protection for action taken in good faith is provided under section 60 of WPA 1972.
7. Establishment of "Control Cell" at Circle level

A Tiger cell has been formed in the state vide Govt. resolution dated 7.11.2000 under the chairmanship of additional Director General of Police (Head quarters) for co-ordination between the police, Forest and other Department to check poaching and illegal trade in wildlife. Similar committees are also have been formed for each revenue commissionerate division under the chairmanship of special Inspector General of Police (Range). These committees may be used for the preventing and detection of offences and offenders.

On these lines Conservator of Forest (all) should also form wildlife crime detection and monitoring cell at their circle level under the chairmanship of divisional forest

officer (vigilance) and at each division level under range forest officer (mobile squad). These cells must be formed immediately and intimated to the chief conservator of the forest, conservator of forest, Deputy conservator of forest will review the progress of these cells every month. The circle level cell will remain in touch with the revenue division level tiger cells. The chief conservator of forest (Protection) and conservator of forest (territorial) will review the performance of these circle level cells while reviewing the conservator of divisional forest officer (vigilance).

8. Other important instructions

8.01 When any wild animal is found dead due to suspected poaching or accident, the carcass should be disposed of after drawing “Panchnama”. No part of the dead animal should be prescribed unless required as part of a court case. The whole carcass of tiger and panther shall be disposed by burning.

8.02 The preliminary information regarding death of wild animal will be sent by the concerned range forest officer within 12 hours of detection to the division office. The Deputy conservator of forest /division forest officer will inform the concerned Conservator of forests and Chief conservator of forest (WL) within 24 hours after detection. He should also visit the spot within 24 hours. All Conservator of forests and Deputy Conservator of forests have been instructed in this matter by Chief Conservator of forests (WL) vide his letter no. desk 23 (B)/07 dated 3.4.2001 it is important to inquire preferably and immediately into the offences related to wildlife.

8.03 The detailed information to be submitted within a week after preliminary information shall include all the information in the enclosed proforma. (Appendix. IV). The deputy conservator of forest will submit this proforma by speed post to concerned conservator of forest and chief conservator of forest (WL). All the officers shall see that control and monitoring of offences will be effective after the information of above mentioned circle and division level “detection and monitoring cell” it is required to concentrate the focus on the cases detected outside the PA,s. therefore chief conservator of forests (Protection) and conservator of forests (territorial) shall taken regular review of “Detection and monitoring cell” and required Deputy conservator of forest shall taken guidance and help on technical matters from conservator of forests (WL) and chief conservator of forests (WL).

8.04 The works like formation of new water bodies, planting fruit species, meadow development shall preferably be undertaken for conservation and development of wild animal habitat. The development of habitat will boost the population of herbivores, which in time increase the predator population. Regular desalting of waterholes, forest tank, forest bandharas

and anicuts shall be done to make water available during summer and pinch period. It is also important to guard them from poachers and domestic cattle.

8.05 In conservation and development of wild animals, continuity of forest cover is essential to avoid inbreeding and to bring forth genetically viable future generation. In today's scenario these forests are fragmented and connected to each other either through agriculture fields or fallow lands. Therefore it is essentially to educate the local community living around these areas and remove the landranch from corridors to maintain the continuity. This includes regular maintenance of all the important water bodies frequently used by wild animals and to ensure that these are not shared by domestic cattle. Separate drinking water facility shall be corrected for cattle around villages and regular vaccination programs shall be undertaken, so as to avoid spreading of communicable disease. Forest officers through meeting/seminars shall convince the local villagers about reducing the disturbance in these areas.

8.06 To reduce the conflict between wild animals and local villagers, cooperation from police patil, gramsevak, office bearers of grampanchayats, and NGOs should be sought the complete. The empathy for wildlife should be corrected among the local villagers and it should be utilised for protection. The Constitution also visits every citizen with the responsibility to protect wildlife.

8.07 Villagers living near the forest use water for their daily needs from the sources within the forest, such as rivers, streams and forest tanks etc. This may cause a reason for conflict between wildlife and villages. Therefore local forest officers shall bring this to the notice of district administrations in writing and follow up the matter.

8.08 The deputy conservator of forests shall visit to actual spot in case of death of tiger, panther, black buck and other schedule species.

8.09 The officers/employees working at different levels in forests, social forestry and forest development corporation shall collect information in the area under their jurisdiction and submit the same regularly to their superior officer and shall implement above instructions meticulously. All the officers/employees whenever in tour for inspection shall review the measures implemented for the conservation and protection of wildlife and suitable instruction may be given. Senior officer shall take a note in every officers and employees confidentially report (CR) regarding his contribution towards wildlife.

Standing Order No. 002

Sub :- Eco- tourism-Initiation in State of
Maharashtra.
No. CCF/ PT&SP/416, Dt. 07/02/2002

The initiation of Eco-tourism in the remote forest areas of the State of Maharashtra has been under consideration of the Forest Department since quite some time. While a Committee has been established to draft a detailed policy of eco-tourism in the forest areas the Forest Development Corporation of Maharashtra Limited is being permitted separately to take over the Rest Houses at Kolsa and Sillari including compound of these locations. The committee is expected to submit its report within a month to the undersigned. Forest Development Corporation of Maharashtra Limited is supposed to induct Eco-tourists in these two locations with effect from World Forestry Day. I.e. 21st March 2002. It is also desirable to initiate eco-tourism in the territorial and wild Division as well as Circle of the Forest Department in the State of Maharashtra. To do so, following directions for compliance as per time are issued.

1. The DCFS territorial and Wildlife Division should immediately identify tourist spots within forest area and en-route in non-forest area and map them on their Divisional Map indicating the approach roads.
2. Eco-tourist routes for approach, locations of water, food, petrol, oil and lubricants, minor and major repair workshops for vehicles, Rest Houses of Forest and other departments, small reasonably priced hotels/homes(Paying Guest) for halting, small centers of Forest Products, local culture, archeological sits, festivals, traditions shops etc. etc should be located on this route.
3. One day, two days, 3 days to 7 days eco tourism circuit tours should be chalked out including necessary required halts at suitable intervals for various services required by the eco-tourists.
4. In every Division, at-least 5 resource persons such as Forest Guards, Foresters and even Range Forest Officers be identified who are satisfactorily competent and are familiar with these routes and locations as described above. Their responsibilities should be to take the eco-tourists on 1 to 7 days tours within the Division and accompany them throughout till their tour is completed. Services of /Forest Department Officers as provided above primarily will not be charged except that the Traveling allowances and Daily allowances shall be met by all these eco-tourists in

- whose vehicles these resource persons would accompany them. This is to begin with. After the State Government finalises suitable policy in this matter, detailed rates would be finalized and levied for which separate orders will be issued.
5. In every Division a Nodal Cell of Eco-tourism should be opened with responsible officer heading the Cell. These responsibilities should be in addition to their own present duties. This cell should be nucleus of the eco-tourism cell in the Division. There is no harm if DCF decides to have a eco-tourism cell in their ranges. How this should be organized in the ranges should be thought over and implemented. At the Circle level, CFs should oversee the above planning, implementation and monitoring it, including prescribing the reports to collect sufficient data at Circle level for monitoring and controlling measures as well as future planning.
 6. CFs should also in their Circles to chalk out inter-divisional eco-tourism routes, identify resource persons and open a Cell within their offices through which they should initiate this interaction of Forest, wildlife and eco-tourists. It should be always kept in mind that while planning for eco-tourism in the protected areas, reserved forests and protected forests where many legislative measures are being implemented, the implementation of eco-tourism should not be in contravention of the existing systems of working and protection. In a nutshell what must be always kept in mind while planning and executing the directions above, no official should compromise the principles of conservation of forests and wildlife protection.
- 2.0 The Dy. Conservator of Forests would submit within two weeks an Action Taken Report (ATR) to their CFs. CFs should make a comprehensive report to the Chairman of the Eco-tourism Committee Draft Policy Shri B. Majumdar, CCF (Wildlife) within 3 weeks from today.
 - 3.0 Shri. B. Majumdar as Chairman of the committee should incorporate above directions and guidelines as well as the important points that may emerge out of this initiation of eco-tourism in the remote forest areas of the State.
 - 4.0 On 21st March 2002 the DCFs and CFs shall hold a press conference and brief the press about initiation and launching of Eco-Tourism and give them above details for informing people at large.
 - 5.0 If any doubt arises in minds of DCFs/CFs they are at liberty to contact me in person any time.
