Subject:- Forest Boundary Demarcation and Erection of Permanent Boundary Marks.

Ref:- (1) Letter no /cf /lrc/sr4-34/153/2002-03/153 dt.21/06/2002

(2) Letter no /d.27/cflrc/sr-34(3)/104/2006-07 dt.3/5/2006

- 1.0 Background :-** Forest Land is the basic resource, bounded by natural and artificial boundaries. Forest lands are also adjoining to Revenue Lands and Private Lands. In order to protect the Forest land it is necessary to properly demarcate the boundary and erect proper boundary marks on the Forest Boundary at proper places. The Forest Department has been using different types of boundary marks to demarcate the Forest Boundary for several decades. The maintenance and repairs of these boundary marks is a recurring task. The clearance of boundaries of forests is carried out once in a five year period under budget head 24060102 (Forest Survey, Demarcation and Settlement) as a 1/5th demarcation plan. Generally two types of boundary marks (Class-I & Class-II) were prescribed in the Bombay Forest Manual Vol.II which were subsequently adopted in the Maharashtra Forest Manual. Details are given in Maharashtra Forest Manual Vol-II Part V [C] article 5.10. While demarcating the Forest Boundary stone cairns / RCC pillars are erected in the past.

The shape of these cairns was a truncated cone with the following dimensions

Description	Class-I Cairn	Class-II Cairn
Flag stone	15"	15"
Foundation	0.30 m	0.30 m
Base	2.10 m dia	1.20 m dia
Height	1.5 m	1 m
Top	1.20 m dia	0.75 m dia

At the centre of top, wooden post or stone of rectangular size of 15" height is prescribed. Class-I cairns were erected at main points and angles, whereas Class-II cairns / pillar were erected in between two cairns / pillar in such a way that one cairn/pillar is clearly

visible from the previous one. During 2001, R.C.C. pillars of 1.40 m. length (class-I) and 0.90 m. length (class-II) were prescribed for boundary demarcation in sensitive forest area.

2.00 Need for Creation of permanent Boundary mark :-

The fact regarding the non-clarity of boundaries of forests in India and its effect on increasing the probability of encroachment & illegal mining on forest lands, was brought to the notice of Hon'ble Supreme Court in petition no. 202/95 T. N. Godaverman Vs Govt. of India and petition no. 224/97 through a report prepared by a committee Constituted under the Chairmanship of Additional Inspector General of Forest, Govt. of India. In many states, including Madhya Pradesh, a firm determination to fix the permanent pillars on well surveyed and demarcated boundaries was taken as per the commitment given to Supreme Court by the committee constituted by Govt. of India.

3.00 Present Status: Boundary and Boundary marks:-

For proper management and protection of forests prominently visible, clean and permanent boundary marks is a pre-requisite. Due to enormous increasing land hunger and also due to steep rise in the cost of land, these easily replaceable cairns had gradually lost their protective significance and strength. So these cairns were replaced by RCC pillars. With the advent of GIS based technology, it is felt essential that a forest boundary mark must clearly show its positional co-ordinates and other important information regarding forest land for assisting the field staff in protection activity. On these RCC pillars, except its serial number, no other information could be written. Further at some places, these pillars were found broken and iron bars stolen.

Following are some of the serious limitations of existing boundary marks which are posing multifarious threats to the existing forest estate.

1. Life - Easily replaceable, removable boundary marks.
 - Not permanent, temporary and fragile.
2. No geo tagging, No geo referencing
3. Ground position does not concur with the information given on MAP.
4. Poor visibility in the night.

4.00 After careful study of boundary pillars prepared in adjoining Madhya Pradesh State and after careful study of prototype of boundary pillars of various dimensions erected in the field, on dated 17th May, 2019, a team of Senior officers Chaired by Principal Chief Conservator of Forests (Head of Forest Force) M.S. Nagpur, after detailed deliberations, **proposed the following design of class-I and class-II boundary pillars for the forest boundary in the State of Maharashtra to be adopted from year 2019-20 onwards.**

Sr. No.	Description	Class-I boundary mark	Class-II boundary mark
1	Flag stone (to be casted at the time of casting of pillar)	0.23mx0.23mx0.23m	0.23mx0.23mx0.23m
2	Foundation size below G.L.	0.90mx0.90mx0.30m	0.60mx0.60mx0.30m
3	Base size	0.90mx0.90m	0.60mx0.60m
4	Height above G.L.	1.00m	0.75m
5	Top size/dimension	0.60mx0.60m	0.45mx0.45m
6	Weight	1687kg	674kg
	Construction cost as per 2018-19 S.S.R. Rs. (Note:- The estimated cost may vary as per site conditions & it is exclusive of taxes)	6700/-	3400/-

Designs, plans and estimates of these proposed Class-I & Class-II boundary pillars are enclosed as Annexure-I

5.00 Hence in supersession of earlier instructions under reference 1&2, in exercise of powers vested as per sub rule (3) of rule 70 of the Maharashtra Forest Rules 2014, the Designs and Standards of permanent boundary pillars as indicated in Annexure – I of this circular are hereby approved for the State of Maharashtra. **It is hereby directed that whenever & wherever boundary pillars are erected, these approved designs of permanent pillars shall be adopted by all the three wings viz. Forest, Wildlife & FDCM Ltd. in the State of Maharashtra. The works of erection of boundary pillars shall be carried out as per the guidelines mentioned below.**

5.1. During 2019-20, Survey/demarcation works are to be carried out as per survey demarcation scheme within the sanctioned budget. **Those pillars which are broken or stolen away or dismantled shall be replaced by the new approved pillars. While erecting a pillar, the correct position of the pillars shall be ascertained by the officer not below the rank of Assistant Conservator of Forests. The necessary certificate for ascertaining the location duly signed by ACF should be preserved as a permanent record of the land records of the division. The necessary information as enclosed herewith shall be painted on newly erected pillars.** It is decided to erect the permanent pillars on the boundaries of forests in the entire state within next five years i.e. up to 2025-26. The officers in-charge of Forest Division are requested to assess the entire length of boundary and prepare detailed estimates for erecting new pillars replacing old one in their division along with DGPS survey of boundary wherever required. Divisions shall place requisition or the grants accordingly.

5.2 For erection of permanent pillars, following areas shall be given top priority.

- Forest areas vulnerable to illegal mining

- ii) Forest areas inside or surrounding cities.
- iii) Forest areas adjoining revenue lands and private lands.
- iv) Newly notified areas u/s 4-20 & 29 of the Indian Forest Act 1927.
- v) Newly notified areas u/s 18, 26-35 & 38 of the Wildlife (Protection) Act 1972.

- 5.3 Annual work of survey and demarcation includes the DGPS Survey wherever required, clearance of boundary line and erection of permanent boundary pillars. The technical sanction as per new design and plan for construction of boundary pillars shall be given by respective Deputy Engineer in the circle. Site specific estimates shall be prepared by Engineers/Deputy engineer as per S.S.R rates applicable for that year and these estimates shall be technically approved by the engineers as per the delegated powers. For Technical sanction and Administrative approval, competent authority shall be as per GR No. MSC-2011/CR. 178/F-5, dated 30/09/2011.
- 5.4 After getting technical sanction and administrative approval work shall be completed within the sanctioned budget as per the existing norm. Class-I pillars shall be erected at the corners or at the point of change of survey number and at the end points of straight lines. Class-II intermediate pillars shall be erected at suitable distances such that next pillar is clearly visible from the previous one. As a general norm approximately two Class-I pillars and three intermediate Class-II pillars shall be fixed for every 1 k.m. length of boundary.
- 5.5 The pillars and the indicator stone shall be painted and the required information shall be written on it, as per the instructions attached herewith in Annexure-II. The serial number on the pillar shall be as per pillar register and as mentioned in the working plan. In absence of these documents, the pillar number in the divisions shall be decided by the committee Chaired by the Chief Conservator of Forests of the territorial circle. The Working Plan Officer and the concerned Deputy Conservator of Forests shall be the members of this committee.
- 5.6 The location of the pillars before construction shall be verified from the following documents by the officer not below the rank of ACF.
- 1. Survey of India Topo sheet
 - 2. Pillar Register in the electronic format
 - 3. Compartment history
 - 4. Notification regarding R.F/P.F/Sanctuary and National Park
 - 5. Village Map

6. Report of the Forest Settlement Officer
7. Working plan/Management map
8. Maps prepared by Forest Survey and demarcation units.
9. GPS Verification
10. Cross verification with local Bench marks erected & preserved by Land Record Department.

The certificate of verification to that effect shall be a permanent part of land records.

- 5.7 After construction of pillars, the work of construction shall be checked for quality by the officer not below the rank of ACF.
- 5.8 During construction of pillars, the sample of cement mortar mix shall be taken and checked for the quality control by the engineering wing as per prescribed norms and the certificate shall be maintained as permanent part of land records.
- 5.9 Photograph of the pillars so constructed shall be uploaded on Asset Monitoring System of IT cell and shall also be preserved at Division and Range level.

COMPARTMENT HISTORY

कक्ष इतिहास

Reference: - National Working Plan Code – 2014, Chapter IX, Page No. 51-54

109. This should be written / updated by the WPO / DFO territorial as his inspection of forests proceeds and should be a well-documented description of the lowest management unit in the field i. e. Compartment / Village. Normally they should be updated before the working plan is completed. The following forms (in two sets, one each for Range and The Division) are used for writing the Compartment History for each management unit (Compartment / Village):

- CH Form – 1 Compartment Description
- CH Form – 2 Compartment Enumeration
- CH Form – 3 Bio-diversity Assessment
- CH Form – 4 Management Details
- CH Form – 5 Details of NTFP including MAPs
- CH Form – 6 Tree Marked for Felling since Last Plan
- CH Form – 7 Compartment Out-turn
- CH Form – 8 Harvesting of NTFP
- CH Form – 9 Past Events during the Last Plans in the Compartment
