APPENDIX NO. XLV

(Vide Para II-7.7.9)

STANDING ORDER 001
FROM PRINCIPAL CHIEF CONSERVATOR OF FORESTS (WILDLIFE) MAHARASHTRA STATE, NAGPUR

Issued on 07.03.2003

Measures for protection of wildlife outside the protected areas

Geographical area of Maharashtra State is 307 lakh hectares. Out of this 63 lakh hectares are under forests cover. These forests are under the control of the Revenue and Forests Departments to the extent of 8 lakh and 55 lakh ha respectively. Various wild animal species exist in these forests and also outside. Depletion of forests has created a major problem related to wild animal habitat and protection like increase in wildlife poaching and illegal trade/ smuggling. Sanctuaries and National Park are established to provide protection to wildlife. In all 35 Sanctuaries and 5 National Parks which includes 3 Tiger Projects are established in the state of Maharashtra. The area thus formed as Protected Area (PA) is 7 lakh ha. Apart from this, area formed as Great Indian Bustard (GIB) sanctuary is 8 lakh ha. There is a separate wing under forest department to manage these PA's. In the national level wildlife estimation (Census), year 2001, it is revealed that wildlife population especially that of Tiger in the Non PA areas is declining steadily every year. If proper measures are not taken then Tiger and other wild animal species will become extinct, causing a serious environmental crisis which in turn will affect the quality of the existing forests and their conservation in general.

The main reason behind this depletion in wildlife population in these areas is lack of proper protection as well as lack of enough measures and initiative to conserve their habitat and surrounding. The way wild life habitat and water hole development is looked after in PA's is not looked as well in non-PA areas. In non-PA areas wildlife is facing poaching, habitat destruction and fodder and water shortages, which causes a serious threat to their breeding and conservation. Illegal poaching and insufficient breeding, results in faster depletion of population than expected. In these circumstances, we need to act urgently to protect forests and wildlife so as to check environmental degradation. Conservators, Deputy Conservators and Assistant Conservators of Wildlife wing will assist, co-operate and guide the

territorial staff (officers and other employees) technically to save wildlife and its habitat in the areas outside PAs.

Tiger, which is the symbol of safe and healthy environment, it at the apex in the food pyramid and hence it is utmost important to protect it for the continuance of life on mother earth. In Maharahtra during the All India Estimation of Tigers in 2001, the total of 238 Tigers were recorded. The population of Tiger is stable in the PA's for last 8 to 10 years but it is not so outside. Hence it is the need of the hour to concentrate on the protection of Tigers in these areas.

The officers/employees working for the cause of forests conservation out side the PAs such as those working for Forest Department (territorial), Social Forestry and Forest Development Corporation cannot pay special attention for the protection and conservation of wildlife. In this regard Chief Conservator of Forests (WL) has issued suitable instructions through his letter No. Desk- 23(6)/190 dated 25/4/2001.

Under the Wildlife (Protection) Act 1972, the state government delegated vide its letter No. Desk 22 (A)(4)/C.No.117/1180 dated 23.9.1993 certain powers to forest officers at all levels for the protection of wildlife and to take appropriate measures for anti poaching. The Chief Conservator Forest (WL) vide his letter No. Desk-23(3)/2899 dated 25-1-2002 had prescribed measures to control crop damage by wild boars.

For effective wildlife protection and conservation in non PA areas, the following consolidated standing orders are issued for immediate implementation:

1.0 Establishing secret information network for wildlife protection

It is most important for all forest officers to establish informer networks at their level to prevent and investigate into offences related to wildlife. Local villagers, vanmajurs and Forest Guards are generally aware of all activities in their areas. Senior officers should interact more with local staff and villagers and solicit important information from them. They should also offer suitable rewards to the officers and staff who excel in curbing illegal poaching and trade in wildlife. A note of such work should be taken in their service books.

Territorial forest officers are hereby intructed to implement the following protection and antipoaching measures in the areas under their jurisdictions:

1.01 All the forest officers, right from forest guard onward will remain always alert in their daily duties regarding wildlife protection and conservation.

1.02 The concerned Deputy Conservator of Forests will prepare an annual plan for such areas including budgetary provisions. They will also inform their higher officers immediately about illegal hunting and other incidences.

1.03 The above measures include following items:

A) **Measures to be taken by the Forest Guard :** Forest Guard is an important institution of wildlife protection. Obtaining all preliminary information about wildlife related information/offences from him and following them up well help to control wildlife offences.

The forest guard should therefore –

1) Always move around and acquaint himself thoroughly with the entire area including wildlife habitats and water holes under his jurisdiction.

2) Get conversant with all important wildlife species found in his beat. He must gather information about location and movement of wild animals by moving around in the beat and also by soliciting information from locals.

3) Since poaching by tapping electric transmission lines passing through the forests is on the rise, the Forest Guard must inspect the lines regularly, to prevent poaching by electrocution also to avoid accidentally touching them while at night.

B) Measures to be taken by the Forester:

Supervise the Forest Guards regarding performance of duties as prescribed above.

1) Keep record of all water bodies especially those water holes, which hold water even during acute scarcity period and depict them on a suitable map of his Round.

2) Regularly inspect all these water holes and ensure that miscreants do not poison them.

3) Take up night patrolling along with the Forest Guards and their assistants.

4) Report all cases of cattle kills and human loss due to wild animals to higher officers within 12 hours.

5) Take precaution that the carcass of dead cattle is not poisoned.

6) Keep record of all weapon holders in his jurisdiction.

C) Measures to be taken by Range Forest Officer:

1) Take regular review of all the measures taken by Foresters and Forest Guards under his control.

2) Earmark sensitive zones on his range map, which will include details like an electric transmission lines, areas of abundant wild animals, location of licensed weapon holders etc.

3) Ensure that the Foresters/Forest Guards regularly patrol the sensitive area and also obtain Beat "Khariyat" report. The report will include information on movement of wild animals especially that of Tigers and Panthers.

4) Regularly visit and if required, stay overnight at the beat headquarters and keep contact with the locals and thereby build his own secret network.

5) Deal promptly in cases of cattle kills by wild animals to compensate their owners expeditiously.

6) Ensure that no illegal sale of wild animal meat is carried out, specially in weekly bazaars and he must obtain regular reports of the same from his subordinates.

7) Ensure that there is no illegal collection of Tendu leaves from PAs and there surrounds (3 kms) and see that legal action is initiated against the concerned, including the contractors accepting such Tendu leaves.

D) Measures to be take by Assistant Conservator of Forests

1) Regularly obtain reports regarding wildlife protection from their Forest Guards/Forester and RFOs, and through surprise checks ensure all his subordinate staff are carrying out their duties as prescribed.

2) Regularly patrol the sensitive areas under his jurisdiction with local staff and monitor the movements of suspicious offenders.

3) Supervise and ensure that fire protection measures are carried out timely and effectively.

4) Powers to enquire in to the offences related to wildlife are vested with Assistant Conservator of Forests. Therefore he should pay proper attention to every enquiry and ensure that self contained and water tight complaints are filed in the Court. He should submit regular review of all the court cases to his Deputy Conservator of Forests/Conservator of Forests. He also must ensure that all the witnesses attend their cases timely. If this is not happening then he should report the matter to the Hon. Court.

1.4) The Government vides its order No. Desk-22(D) (1)/C.No.117/1180 dated 23-9-1993 delegated certain powers to forest officers under WPA 1972. Some of the important sections and powers delegated under them are given below:

Sr No	Section of the Act.	Extent of power	To whom delegated
1	11(1)(b)	Power to grant permission to hunt a wild animal other than sch 1 which has become dangerous to human life or to properly.	Addl. CWLW, Dy.CWLW
2	39(2)	Power to receive the report of and to take over possession of Govt. property.	Addl.CWLW, Dy.CWLW, Wildlife Wardens and Asst.Wildlife Wardens.
3	40(1)	Power to receive declaration by a perion in control, custody or possession of any captive animal specified in sch. 1 or part II of sch- II.	Addl. CWLW, Dy.CWLW
4	41(1)	Power to enter upon the premises to make enquiries, prepare inventories of animal articles etc. and to affix identification mark etc.	Addl.CWLW/ Deputy CWLW/W.L.W/ Asst WLW
5	50(1)(3)	Power to enter upon and search any premises and search any vehicle etc. and to seize etc.	Addl.CWLW/ DeputyCWLW/W. L.W/Asst WLW
6	54	Power to compound offences	Addl.CWLW/ Deputy CWLW/
7	55	Power to make complaint to the court	Addl.CWLW/ Deputy LW/W.L.W/ Asst WLW/Honorary WLW

Deputy Conservator of Forests should regularly monitor works of Forest Guard/Forester/RFO's and check their wildlife related records.

1.5) Wild animals sometimes do venture in to the villages surrounding from forests and thereby come in contact with villagers. Villagers residing in the forest look at these animals with fearful reverence. Therefore it is essential to keep thee villagers educated about wildlife through leaflets, video cassettes and through direct meetings. It is the duty of all to increase sympathy among the masses for wildlife and to convince them about the need to balance the environment through conservation of wildlife. An important target should be a school student. Normally workshops/seminars/educational tours are conducted in PA areas for staff as well as locals but in non-PA areas it is not so arranged. Therefore Deputy Conservator of Forests/Conservator of Forests (territorial) must look into specifically and see that minimum of 2 education tours/ workshops will be held for Forest Guard/Forester/Village Protection Committee and locals in every range and every year. The cooperation of wildlife wing may be taken. They should include this in APO and budget and implement the same.

1.6) Considering gradual decrease in the wildlife population the Deputy Conservator of Forest / Conservator of Forests (territorial) will identify areas, where endangered and schedule I species such as the Tiger, Panther, Bear, Wild dog are normally found and take shelter, and use as breeding grounds. Such area should be declared as ""sensitive areas". The Conservators/Deputy Conservators will prepare annually operation plan and make budgetary provisions for the measures proposed to be carried out in such areas and ensue that these are effectively implemented. The measures shall include following three points:

1) A division level critical report for sensitive area shall be prepared mentioning population of existing wild animals, their status and whether they are on the verge of extinetion at local as well as state levels.

2) The information about the sensitive area is to be gathered and shown on each Range map depicting the animal's habitat, breeding grounds, movements area (corridors) etc. The perceptible threats to their

survival must also be identified and measures to be implemented to overcome these.

3) The information about the availability of water and fodder in the area should be collected and measures must be implemented to overcome the limiting factor regarding it.

An action plan thus prepared at the division level must be implemented and the implementation of it must be reviewed regularly at the Conservator of Forest's level. This will take care of the conservation, breading and protection of wildlife and will help to restore their population and stabilize the population.

1.7) Street performers (madaris) earn their livelihood by displaying Bears, Monkeys, snakes and Mongoose and for this purposes they are subjected to cruelty. Wild animals are ill-treated during their training. Hence the Central Government has banned all such performances by Lions, Tiger, Panther, Bears and Monkeys. The legal action shall be initiated wherever violation of the said order is observed.

1.8) Some animals like Deer, Moogoose, Hare, birds, snakes and in some exceptional cases predators like Panther and Tiger are kept in captivity without legal permission. An offence must be booked in such cases. Hunting of all wild animals is prohibited under WPA 1972 and it is a cognizable offence. This information must be explained to all.

2.0 **Keeping track of wild animals movement**

Wild animals move inside or even outside the forests, Local staff should keep a track of movement of these wild animals. Specially Tiger, Panther and Black buck. Wild animals stray outside the forests specially in rainy and summer seasons and it is observed that during this season, they are likely to get hunted/poached. During this season forest staff should keep a track of their movement and take care that nothing untoward happens to them by the miscreants. It also should be borne in mind that the miscreant does not use this information.

3.0 Help of the local Forest Protection Committees.

As number of local Forest Protection Committees has been established. They can actually help in a coordinated manner to collect information about animals found outside the boundary of NP and sanctuaries. In many cases they stray out of these borders and some times get killed. The forest staff from such areas shall collect such information from these Forest Protection Committees (F.P.C's) and this may be incorporated in their main objectives, if required.

3.01) **Wild Animal Protection Committee.**

Many species of wild animals are found in surrounding forests of NP and sanctuaries. In the adjoining villages where "Joint Forest Management Committees" have been established, a subcommittee for the protection of wild animals will be established. It is expected that there will be 3000 such sub-committees and wildlife conservation and protection will be the main objectives of these sub-committees. The proposal may be submitted to utilize the funds for the development through Central Government's Eco-development schemes.

4.0) **Illegal Trade in Wildlife**

It was revealed during the review of pending wildlife related court cases that a large number of wildlife offence cases are detected, booked and filed in the various courts but are not monitored regularly in the courts which result in the acquittal of offenders. Therefore all court cases must be monitored regularly. Every forest divisions must prepare a list of accused and suspicious offenders. A list with photographs of all the habitual offenders must be maintained and kept in range offices.

4.01) Trading and even export of Deer and Sambar shed antlers was going on till the year 1998. Government of India Commerce Ministry's resolution dated 4.8.1998 has prohibited export-import of the shed antlers. It has also banned export of Peacock feathers, but dealing in peacock feathers in the domestic marked has not been effected. In this regard Conservator of Forest's/Deputy Conservator of Forest's/RFO's shall ensure proper implementation of these orders.

5.0) **Man-Animal Conflict.**

It is utmost important to balance the environment through wildlife protection. According to National Forest Policy 33% area should be under forest cover and it is essential to keep maximum area of this as PA. The ever

decreasing forest cover and ever increasing people's demand does not go hand in hand, which leads to tussle between wildlife and local community. The population of wild animals is on the rise in PA's due to protection they get, whereas herbivores are increasingly raiding the adjoining fields and cause severe crop damage Forest departmental has received number of applications in this regard. Hence the government took cognizance and has set up a Secretary level committee under the chairmanship of Chief Secretary. The committee has taken following three decisions:

1) Insurance against crop damage.
2) Raising stonewall between fields and forest to prevent crop-damage.
3) Hunting wild pigs, if it is unavoidable.

Out of above decisions, insurance against crop damage is pending for finally decision at Govt. level, Whereas other two are finally decided. Constructing stone wall against crop damage is to be taken up under EGS. The estimates of these works shall be sanctioned through concerned District Collectors. This office has issued detailed instructions vide letter No. Desk-23(3)/Secretary level /2899 Dated-25.1.2002 for hunting of wild pigs. These instructions are to be followed and implemented.

6.0 **Appointment of Honorary Wild Life Wardens and their duties.**

Honorary wild life Wardens have been appointed for each district as per section 4 (1)(bb) of WPA 1972. They have been delegated to use powers of sections 55 vide Govt. Resolution dated 27/9/2002 honorary wildlife Wardens are expected to perform following duties.

1. Control poaching and clandestine trades in wild animals and products / articles thereof.
2. Identify and select the areas suitable to be declared as Sanctuaries, National Park for proper Conservation and Protection and Wildlife.
3. Prevent damages to Wildlife habitats.
4. Take appropriate measures against damage by wild animals to life and economy.
5. Carry the massage of conservation to the people and enlist public support for nature and wildlife conservation.

6. Participate in any other matter related to protection of wildlife which may be entrusted by the Wildlife Advisory Board or CWLW of the state from time to time. It is essential to enlighten and create awareness in the public about nature and wildlife conservation. He is deemed to be a public servant within the meaning of the section 21 of Indian Penal Code and protection for action taken in good faith is provided under section 60 of WPA 1972.

7. Establishment of "Control Cell" at Circle level

A Tiger cell has been formed in the State vide Govt. Resolution dated 7.11.2000 under the chairmanship of Additional Director General of Police (Head quarters) for co-ordination between the Police, Forest and other Department to cheek poaching and illegal trade in wildlife. Similar committees are also have been formed for each Revenue Commissionerate Division under the chairmanship of Special Inspector General of Police (Range). These committees may be used for the preventing and detection of offences and offenders.

On these lines Conservator of Forest (all) should also form wildlife crime detection and monitoring cell at their circle level under the chairmanship of Divisional Forest Officer (Vigilance) and at each division level under Range Forest Officer (Mobile Squad). These cells must be formed immediately and intimated to the Chief Conservator of Forest, Conservator of Forest, Deputy Conservator of Forest will review the progress of these cells every month. The circle level cell will remain in touch with the revenue division level tiger cells. The Chief Conservator of Forest (Protection) and Conservator of Forest (territorial) will review the performance of these circle level cells while reviewing the conservator of Divisional Forest Officer (Vigilance).

8. Other important instructions

8.01 When any wild animal is found dead due to suspected poaching or accident, the carcass should be disposed of after drawing "Panchnama". No part of the dead animal should be

prescribed unless required as part of a court case. The whole carcass of Tiger and Panther shall be disposed by burning.

8.02 The preliminary information regarding death of wild animal will be sent by the concerned Range Forest Officer within 12 hours of detection to the division office. The Deputy Conservator of Forest /Division Forest Officer will information the concerned Conservator of Forests and Chief Conservator of Forest (WL) within 24 hours after detection. He should also visit the spot within 24 hours. All Conservator of Forests and Deputy Conservator of Forests have been instructed in this matter by Chief Conservator of Forests (WL) vide his letter no. desk 23 (B)/07 dated 3.4.2001 it is important to inquiry preferably and immediately into the offences related to wildlife.

8.03 The detailed information to be submitted within a week after preliminary information shall include all the information in the enclosed proforma. (Appendix. **IV**). The Deputy Conservator of Forest will submit this proforma by speed post to concerned Conservator of Forest and Chief Conservator of Forest (WL). All the officers shall see that control and monitoring of offences will be effective after the information of above mentioned circle and division level "detection and monitoring cell" it is required to concentrate the focus on the cases detected outside the PA,s. therefore Chief Conservator of Forests (Protection) and Conservator of Forests (territorial) shall taken regular review of "Detection and monitoring cell" and required Deputy Conservator of Forest shall taken guidance and help on technical matters form Conservator of Forests (WL) and Chief Conservator of Forests (WL).

8.04 The works like formation of new water bodies, planting fruit species, meadow development shall preferably be undertaken for conservation and development of wild animal habitat. The development of habitat will boost the population of herbivores, which in time increase the predator population. Regular desilting of waterholes, forest tank, forest bandharas and anicuts hall be done to make water available during summer

and pinch period. It is also important to guard them from poachers and domestic cattle.

8.05 In conservation and development of wild animals, continuity of forest cover is essential to avoid inbreeding and to bring forth genetically viable future generation. In today's scenario these forest are fragmented and connected to each other either through agriculture fields or fallow lands. Therefore it is essentially to educate the local community living around these areas and remove the hinderance from corridors to maintain the continuity. This includes regular maintenance of all the important water bodies frequently used by wild animals and to ensure that these are not shared by domestic cattle. Separate drinking water facility shall be corrected for cattle around villages and regular vaccination programs shall be undertaken, so as to avoid spreading of communicable disease. Forests officers through meeting/seminars shall convince the local villagers about reducing the disturbance in these areas.

8.06 To reduce the conflict between wild animals and local villagers, cooperation from police patil, gramsevak, office bearers of grampanchayats, and NGO,s should be sought. The empathy for wildlife should be corrected among the local villagers and it should be utilised for protection. The Constitution also vests every citizen with the responsibility to protect wildlife.

8.07 Villagers living near the forest use water for their daily needs from the sources within the forest, such as rivers, streams and forest tanks etc. this may cause a reason for conflict between wildlife and villages. Therefore local forest officers shall bring this to the notice of district administrations in writing and follow up the matter.

8.08 The Deputy Conservator of Forests shall visit to actual spot in case of death of Tiger, Panther, Black buck and other schedule species.

8.09 The officers/employees working at different levels in Forests, Social Forestry and Forest Development Corporation shall collect information in the area under their jurisdiction and submit the same regularly to their superior officer and shall

implement above instructions meticulously. All the officers/employees whenever in tour for inspection shall review the measures implemented for the conservation and protection of wildlife and suitable instruction may be given. Senior officer shall take a note in every officers and employees confidently report (CR) regarding his contribution towards wildlife.

Compartment Description Format (CH Form-1) is as under:

Identification

Division-	**Range-**	**Block-**	**Compartment-**

Description

Title of description	Explanatory notes to write the description
Area (in Hectares)	Total as also under each species or type, blank unworkable, etc.
Situation	As accurate as possible with the help of GPS.
Boundaries	N, S, E, W (mention boundary pillars, ridges, spurs, streams, etc.)
Legal status	Legal status of the forests may be as reserve forest, protected forest, un-classed forest, national park, private forest, private land with tree owned by government and undetermined, etc.
Land Use	The land use type of the plot may be categorised as closed forests, dense forests, open forests, scrub, bamboo brakes, shifting cultivation, young plantations of forestry species, tree in line, forest roads, grass lands, and barren, agricultural land without trees in surround, agricultural land with trees in surround, non-forestry plantations, habitation, and water bodies.
General topography	The topography of the area may be determined from the toposheets and the same may be confirmed by field observations. It may be categorized as flat, gently rolling, hilly and very hilly.
Altitude	In meters. In case of hilly areas give lower and upper limits.

Aspect	Main aspect and variations if any
Gradient/slope	Precipitous, very steep, steep, moderate, gentle, etc.
Configuration	Rugged, undulating, flat, etc.
Rock and geology	Mention main underlying rocks including alluvial deposits
Soil	Texture, depth permeability, drainage, surface compaction, humus, etc.
Soil erosion	Heavy/ moderate/ mild/ no erosion
Crop composition	Mention of major tree species predominant in the area and extent of their representation in terms of percentage may be made.
Regeneration status	Regeneration status may be observed and recorded as adequate/ moderate/poor/absent for major tree species.
Injury/ damage to crop, if any	Insect attack, fungal infestation, leaf defoliator, top drying, girdling, scarring, lopping, damage by natural calamities/ wildlife/fire may be observed assessed and recorded.
Grazing incidence	Depending upon the pressure of grazing exerted on the forests by livestock the incidences of grazing may be categorized as heavy/ moderate/ light/ none.
Presence of bamboos	If yes, brief description of bamboo density, bamboo quality, bamboo regeneration and bamboo description may be made.
Presence of grasses	Ground cover on an area of about 2 ha around the plot (grid) centre may be intensively observed to classify the area for grasses as very dense, dense, moderate, scanty and absent.
Presence of weeds	Ground cover on an area of about 2 ha around the plot (grid) centre may be carefully observed to classify the area for presence of weeds as very dense, dense, moderate, scanty and absent.
Plantation status	If a plantation is in existence in a plot (grid) area fully or partially, the details of the plantation with regard to its area, year of plantation, species, spacement, general growth conditions, average crop diameter, any specific events or happenings related to plantations may be observed, assessed and recorded.
water bodies	Name, type, extent, seasonality of the water body may be explored and recorded. Potability i.e., safe enough for drinking has to be ascertained.
Drivers of degradation	Biotic: Brief account of degradation sources may be given and on the basis of various factors of degradation like grazing, browsing, fire, lopping, girdling, illicit fellings, mining, encroachment, etc. the intensity of degradation may be categorized as heavily degraded, moderately degraded, mildly degraded and not degraded.

	Natural calamities: Degradation due to calamities such as landslides, avalanches, floods, frost, cyclones, droughts may be categorized as heavily degraded, moderately degraded, mildly degraded and no calamities.
Faunal sighting, if any	The flagship species including mammals, birds, reptiles, amphibians, plants, etc. which may be very significant to the area may be identified. Suitable habitats and micro-habitats for such key faunal species may be identified and recorded so as to prescribe appropriate measures needed to conserve and improve.
Faunal traces of flagship species	The entire 2 ha area around the centre of plot (grid) may be scanned for any faunal traces of flagship species. If found the details of the same may be observed and recorded.
Growing Stock	Natural, artificial, storey-wise composition, age class quality, stocking density, regeneration of principal species, etc.
Remarks	The effect of biotic factors should be especially dealt with.

प्रस्तावना:-

१. संदर्भ क्रमांक १ अन्वये राज्यात वनक्षेत्रात गुरेचराई संदर्भात धोरण निश्चित करण्यात आले आहे. संदर्भ क्रमांक २ अनुसार गुरांना वनक्षेत्रात चराई परवाना देण्यासाठी प्राधान्यक्रम निश्चित करण्यात आलेला आहे. त्या अनुषंगाने संदर्भ क्रमांक ३ अनुसार वनक्षेत्रात गुरेचराई संदर्भात नियमावलीस मान्यता देण्यांत आली आहे.

२. मेंढीपालन हा मेंढपाळ कुटुबांचा परंपरागत व्यवसाय आहे. तथापि, संदर्भ क्रमांक २ मधील शासन निर्णयानुसार ठरविण्यात आलेल्या प्राधान्यक्रमात मेंढीचा विशिष्टपणे उल्लेख नाही. राज्यात वनक्षेत्राची व्याप्ती एकूण भौगोलिक क्षेत्राच्या सुमारे २० टक्के इतकी आहे. त्यातही वनक्षेत्राचे प्रमाण सम-समान नाही. बहुतांश वनक्षेत्र एकट्या नागपूर महसूल विभागात (गडचिरोली व चंद्रपूर) आहे. औरंगाबाद महसूल विभागात वनक्षेत्र कमी आहे. अमरावती महसूल विभागात उपलब्ध वनक्षेत्रापैकी जवळ-जवळ एक तृतियांशपेक्षा जास्त वनक्षेत्र अभयारण्य व राष्ट्रीय उद्यानात अंतर्भूत असून त्यात चराईवर निर्बंध आहेत. वर नमूद केल्याप्रमाणे राज्यात बहुतांश ठिकाणी चराईसाठी मागणी इतके क्षेत्र उपलब्ध नाही. उपलब्ध वनक्षेत्रात गुरांच्या ठरविलेल्या प्राधान्यक्रमानुसार चराई परवाने दिले जातात.

३. प्रचलित शासन धोरणानुसार व वन व्यवस्थापनासंदर्भात शास्त्रोक्त तत्वदृष्टी विचारात घेऊन वनक्षेत्रात मेंढीचराईशी निगडीत समस्यांवर तोडगा काढण्यासाठी संदर्भीय शासन निर्णय क्रमांक ४ व ५ अन्वये राज्यात प्रत्येक वन विभागासाठी सहाय्यक वनसंरक्षक दर्जाच्या अधिकाऱ्यांची चराई जमाबंदी अधिकारी म्हणून नियुक्ती करण्यात आली. उक्त सर्व चराई जमाबंदी अधिका-यांकडून प्राप्त झालेल्या

अहवालांना संदर्भ क्रमांक ६ येथील शासन निर्णयानुसार औपचारिक मान्यता प्रदान करण्यात आली. त्यानुसार राज्यात त्यावेळेस असलेल्या एकूण ४८ वन विभागांपैकी २७ वन विभागांमध्ये मेंढीचराईस क्षेत्र उपलब्ध नसल्याबाबत आणि २१ वन विभागात उपलब्धतेनुसार काही प्रमाणात चराई क्षेत्र उपलब्ध असल्याचा उल्लेख सदर शासन निर्णयात करण्यात आला आहे. मेंढीचराईकरीता उपलब्ध असलेल्या आणि उपलब्ध नसलेल्या विभागांचा तपशील खालीलप्रमाणे आहे :-

३.१. मेंढी चराईसाठी वनक्षेत्र उपलब्ध असलेले वन विभाग (एकूण-२१) :-

बुलडाणा, वर्धा, भंडारा, नागपूर, गोंदिया, औरंगाबाद, नांदेड, पश्चिम धुळे (धुळे), उत्तर धुळे (नंदूरबार), सिरोंचा, आलापल्ली, मध्य चांदा, गडचिरोली, वडसा, चंद्रपूर, सावंतवाडी, सातारा, कोल्हापूर, अकोला, सांगली आणि पुसद अशा २१ वन विभागात काही प्रमाणात वनक्षेत्र उपलब्ध करुन देण्यात आले आहे.

३.२. <u>मेंढी चराईसाठी वनक्षेत्र उपलब्ध नसलेले वन विभाग (एकूण-२७) :-</u>

अमरावती, पूर्व मेळघाट, पश्चिम मेळघाट, उस्मानाबाद, बीड, परभणी, अहमदनगर, पूर्व नाशिक, पश्चिम नाशिक, सोलापूर, भोर, पुणे, जुन्नर, ठाणे, जव्हार, शहापूर, रोहा, अलीबाग, डहाणू, मेवासी, यावल, जळगांव, भामरागड, ब्रम्हपूरी, चिपळूण, यवतमाळ, पांढरकवडा अशा २७ वन विभागात वनक्षेत्र उपलब्ध करुन देण्यात आले नाही.

४. तथापि, उक्त शासन निर्णयात असेही नमूद आहे की, मुंबई वन संहिता, खंड-३ नुसार मेंढी चराईकरीता परवाने देण्याचा कालावधी १५ सप्टेंबर ते १५ मे दरम्यान राहील. वनाचे अस्तित्व कायम ठेवण्याच्या दृष्टीने वनक्षेत्रातील नैसर्गिक पुनर्निर्मिती अबाधित ठेवणे क्रमप्राप्त आहे. त्यासाठी जून ते सप्टेंबर या कालावधीत मेंढी चराईबाबत परवानगी देता येत नसल्याने या कालावधीत वन क्षेत्रात चराईस परवानगी देण्याबाबतच्या मेंढपाळांच्या मागणीचे समाधान वन विभागाकडून होत नाही.

५. मेंढपाळांकडून वेळोवेळी प्राप्त होणा-या निवेदनांवर विचार करुन महाराष्ट्र राज्यात मेंढीचराईबाबत उपलब्ध असलेल्या आणि नसलेल्या वन विभागांच्या क्षेत्राबाबत अभ्यास करण्यासाठी संदर्भ क्रमांक ७ येथील शासन निर्णयानुसार खालीलप्रमाणे एक अभ्यास समिती गठीत करण्यात आली:-

१.	प्रधान मुख्य वनसंरक्षक (उत्पादन व व्यवस्थापन), म.रा.नागपूर	अध्यक्ष
२.	मा. श्री. गणपतराव देशमुख, विधानसभा सदस्य	सदस्य

४.	मुख्य वनसंरक्षक (प्रादेशिक), धुळे	सदस्य
५.	मुख्य वनसंरक्षक (प्रादेशिक), नाशिक	सदस्य
६.	मुख्य वनसंरक्षक (प्रादेशिक), अमरावती	सदस्य सचिव
७.	श्री. लहूजी शेवाळे, औरंगाबाद	सदस्य
८.	डॉ. विकास महात्मे, महात्मे आय बँक आय हॉस्पिटल, नागपूर	सदस्य

६. उक्त शासन निर्णयान्वये समितीची कार्यकक्षा पुढीलप्रमाणे ठरविण्यात आली :-

६.१ महाराष्ट्र राज्यातील वनक्षेत्रातील गुरे चराई नियमावली तसेच मेंढी चराई जमाबंदी अहवालाचे पुनर्निरीक्षण करणे.

६.२ महाराष्ट्र राज्यालगतच्या राज्यातील उदा. कर्नाटक, मध्य प्रदेश, छत्तीसगढ, तेलंगणा इ. राज्यात मेंढी चराईबाबत धोरण, नियम, तरतूदींचा अभ्यास करणे.

शासन निर्णय æ

६ó **अनुज्ञेयता, चराईकरीता परवाना कालावधी, शुल्क व प्राधान्यक्रम**

जून ते सप्टेंबर हा कालावधी नैसर्गिक पुनर्निमितीचा कालावधी असल्याने वनाचे शास्त्रोक्त व्यवस्थापन व वनांचे अस्तित्व चिरस्थाई टिकविण्याच्या दृष्टीने चराईकरीता परवानगी देणे संयुक्तिक नसल्याने शासन निर्णय दिनांक ०६/०५/२००८ मधील तरतुदीप्रमाणे मेंढी चराई कालावधी १५ सप्टेंबर ते १५ मेपर्यंत निश्चित करण्यात आला आहे. तथापि मेंढपाळांना जून ते सप्टेंबर ह्याच कालावधीत मेंढी चराईकरीता क्षेत्र उपलब्ध नसल्याने प्रायोगिक तत्वावर दोन वर्षांच्या काळासाठी (सन २०१७ व २०१८) दिनांक १ जून ते ३० सप्टेंबर या कालावधीत बुलढाणा व जळगाव जिल्ह्यातील खालील तपशीलानुसार ३००० पेक्षा जास्त मेंढी संख्या असलेल्या तालुक्यांसाठी वनक्षेत्रात (वन्यजीव (संरक्षण) अधिनियम १९७२ अंतर्गत घोषित संरक्षित क्षेत्र वगळून) मेंढी चराई परवाने अनुज्ञेय राहतील.

११. चराई परवाने फक्त उदरनिर्वाहासाठी (Livelihood) मेंढीचराईवर निर्भर मेंढपाळांना अनुज्ञेय राहतील. वाणिज्यिक (Commercial) तत्वावर मेंढी चारणा-यांना परवाने अनुज्ञेय राहणार नाहीत.

१२. वनक्षेत्रात मेंढीचराई परवाने मंजूर करतांना संदर्भ क्र. २ च्या शासन निर्णयामधील निर्धारित केलेला खालील प्राधान्यक्रम पाळला जाईल. तथापि प्रथम येणाऱ्यास प्रथम मिळेल (first come first serve) या तत्वावर मेंढी चराई परवाने उपलब्ध करण्यात यावेत. तसेच हे करताना समन्यायी वाटप (equitable distribution) या तत्वाचे काटेकोरपणे पालन करावे.

प्रवाह अवरोधक (DRY CHECK DAM)

प्रमाण = १ : 20

जास्तीत जास्त लांबी - ८.00 मीटर

माती, मऊ मुरमातील खुदाई - ८.00 × 3.00 × 0.७५ = 3.६० घ.मी

शुष्क दगडी प्रवाह अवरोधक - $८.00 \times \frac{3.00 + 0.८०}{२} \times 9.१० = १६.७२$ घ.मी

टिप्पणी व विनिर्देश (SPECIFICATIONS)

१. सध्या जमिनीची मोठया प्रमाणात धूप होत आहे. त्याचे कमित कमी प्रमाण १.८० घन मीटर प्रति हेक्टर प्रति वर्ष (२५.७३ घन फूट/एकर/वर्ष) इतके आहे. ही धूप थांबविण्यासाठी प्रवाह अवरोधक प्रस्तावित केलेले आहेत.

२. प्रवाह अवरोधक बांधावयाच्या नाल्याना क्रमांक द्यावेत. पहिल्या क्रमांकाच्या नाल्यावरील अवरोधकांना १/१, १/२, १/३, ...प्रमाणे क्रमांक द्यावेत. दुसऱ्या क्रमाकांच्या नाल्यावरील अवरोधकांना २/१, २/२, २/३ .... प्रमाणे क्रमांक द्यावेत. त्याप्रमाणे मोजमाप पुस्तकात नोंद घ्यावी. तसेच ऑईल पेंटने अवरोधकास जागेवर क्रमांक द्यावेत.

३. अवरोधकाकरीता जागा निवडण्यासाठी नाल्याच्या आरंभापासून सुरुवात करावी. गाळ साठण्यासाठी जेथे खोलागट भाग असेल ती नाल्यातील जागा जास्त योग्य, लहान , मध्यम, व मोठया अवरोधकासाठी ५ मी., ७.५० मी., ९ मी. पर्यंत गाळ साठू शकला पाहिजे. नाल्याची रुंदी ८ मी. पेक्षा जास्त नसावी.

४. अवरोधकाचे काम चालू करतानां नाल्याची काटकोनात खुदाई करावी.नाल्याच्या काठात दोन्ही टोके गेली पाहिजेत.

५. नाल्याच्या पात्रातील आजू-बाजूचे मोठे दगड (डब्बर) निवडून घ्यावेत. ओबडधोबड आकार असल्यास सुतकीने फोडून घ्यावेत. ठिसूळ किंवा गोल दगड वापरु नयेत. प्रत्येक दगड शक्यतो १५ से.मी. X १५ से.मी. पेक्षा जास्त आकाराचा व ३० से.मी. पेक्षा जास्त लांबीचा असावा.

६. साठविलेल्या दगडातील सर्वात मोठया आकारमाणाचे दगड पाण्यात घट्ट बसवावेत. त्यासाठी चिपांचा/बारीक दगडांचा वापर करावा.

७. वरील बांधकामासाठी नाल्याच्या वरील बाजुस १ भाग उंचीस १ भाग समपातळी असा उतार व नाल्याच्या खालच्या बाजूस १:१ असा उतार द्यावा. प्रत्येक दगड उताराच्या काटकोणात पक्का बसला पाहिजे.

८. अवरोधकाच्या मथील बांधकामासाठीही दगडाचा उपयोग करावा. चिपा लावून सर्व दगड बैठकीवर अडकवुन बसविले पाहिजेत. सांध्याची जाडी २.५ से.मी. पेक्षा जास्त नसावी.

९. अवरोधकाच्या सर्वात वरचे बांधकाम कशी केल्याप्रमाणे उभे दगड रोऊन अर्धवर्तुळाकार करावे. पृष्ठभागाचे दगड चिपांनी घट्ट बसवावेत. यामुळे पूर आला तरी अवरोधकाचे दगड वाहून जाणार नाहीत.

१०. जास्त बांधकामाची माहिती आहे, अशा लोकांनाच प्रत्यक्ष बांधकाम करण्यास सांगावे. त्यांनी सुतकीचा वापर करावा.

११. अवरोधकाचा एक दगड जरी सैल राहिला तर अवरोधक वाहून जाण्याची शक्यता आहे. तेंव्हा प्रत्यक्ष बांधकाम करतांना सर्वतोपरी काळजी घ्यावी.

१२. मजुरांना नाल्याच्या वरच्या बाजूस १ फुट उंचीस ६ इंच व खालच्या बाजूस १ फुट उंचीस १ फुट असा अवरोधकास उतार द्यावयाचा आहे हे वारंवार समजावून सांगावे म्हणजे यात चूका होणार नाही.

Evaluation of habitat and human bear conflicts in Buldhana forest division (2018)

SUMMARY

"Evaluation of habitat and human bear conflicts in Buldhana forest division and adjoining areas of Dnyanganga Wildlife Sanctuary - To suggest possible conflict mitigation measures", the research project was carried out for 12 months (April 2017 to March 2018). The project was funded by the Maharashtra Forest Department. The main objective of the research was to find out the causes of increased Human-Sloth bear conflict incidences during year 2016-17 as compared to conflict incidences during previous years and to suggest immediate and long terms mitigation measures.

The study has been conducted in Buldhana forest under Amravati territorial circle in Dnyanganga under Melghat Tiger Reserve and situated in Buldhana district, located in western most part of Vidarbha region of Maharashtra state in India. The forest area is protected with the status of sanctuary under Dnyanganga Wildlife Sanctuary (WLS) known as Botha forest and reserved forest under Buldhana territorial division. The forest area of this region also has two other WLSs viz. Amba-barwa and Lonar WLS which are moist deciduous forest; among which Amba-barwa holds good population of Sloth bears. The objectives of the study were to evaluate sloth bear habitat and assess the reasons behind the increasing human-Sloth bear interactions and to suggest immediate and long term conflict mitigation strategies. The cases of direct human-animal conflicts like human injury or death and indirect conflicts like infrastructural damage by bears, habitat encroachment by humans were reported during the study.

This final report provides some major findings of our research being conducted for 12 months of study period; which mainly includes the sign survey of the sanctuary and territorial forests, habitat use by sloth bear, its feeding ecology, presence and distribution of food resources for Sloth bear, interviewing victims attacked by Sloth bear in order to collect the information regarding conflict, sloth bear attack pattern and the perception of locals towards the sloth bear.

As a part of this study we had also conducted awareness program in villages (the villages were selected on the bases of number of incidences in last 9 years, priority given to villages with high conflict incidences) providing information about bears, their presence in and around their villages/agricultural fields, bear behaviour, precautions to be taken by villagers and some of the major findings of our study. During our visits to villages, we also surveyed the surroundings of the villages to find probable reasons of Sloth bears being attracted towards the village or agricultural fields. Workshop for local field staff were conducted, introducing about Sloth bears, ecology, food consumed, area used and behaviour pattern in different situations in Dnyanganga WLS. Hands on training about field visits, scientific sampling methods, data collection were also given to the field staff by involving them in the survey during the project tenure.

Recommendations

The region is dominated by pastoral and agricultural activities. There are few forest area under Buldhana Forest division with sizable wildlife population including Leopard, Sloth bear, Blue bull, Striped hyena, Jackal, Porcupine, Wild boar, etc. These animals often found moving outside the forest towards agricultural lands and human habitation in search of food or water; where they confronted humans resulting in conflicting situations.

The conflict prone zones were identified and marked on the map using GIS analysis based on the data obtained for attacks (Figure 16.2). During study it is found that areas near the forest boundary, agricultural lands and near roads have comparatively higher rate of conflicts than that of the other intermediating villages.

The report reflects that the bear and human interaction are very acute in the study area because of several reasons like (i) the human activity in territorial forests are common for firewood or green leaf collection or cattle grazing, (ii) human settlements and agricultural lands are very close to the forest areas and (iii) the habitats for the bear doesn't provide their needs, forcing bears to move towards the nearby villages for primary living resources. Such situations are the indicators of the urgent needs of some conflict mitigation strategies or finding out the options of bear-human coexistence in the area. This is supported by figure 15 which shows that maximum bear attacks found in or around the villages in vicinity of the forest.

The entire study and the detailed findings discussed in the result section depicts that the human-wildlife conflicts are reported due to direct but sudden Human-bear surprise encounters. Looking to the habitat condition, local community and occurrence of wildlife in these areas following specific recommendations has been suggested:

1. The areas frequently used by sloth bears either it may be safari routes, road through the sanctuary, village fringes, agricultural lands, temples should have sign boards displaying do's and don'ts to avoid conflict situations and the villagers residing there and passing through the main road through

sanctuary should be made aware. (Dnyanganga Wildlife division/Buldhana Forest division).

2. The rocky and trenches areas near riverine systems mainly harbours large stones or dense vegetation which are considered as good sites or shelter for Sloth bear. This kind of habitat was found used more by the bear than the sanctuary area; such areas should be protected and some artificial dens should be prepared within the sanctuary areas to provide shelter to Sloth bears.

3. Sustenance of bears and their movement activities are governed by the availability of food resources in its habitat. Bears are non-territorial animal and they roam in search of water and food, which are patchily distributed during fruiting seasons. Plantation of fruit bearing trees within and on the border of the sanctuary should be initiated. Selection of tree species for plantation should be in such a manner that sloth bear gets fruit availability in most of the time round the year. (Dnyanganga Wildlife division).

4. The overall result shows the less availability of feeding resources available for Sloth bears inside the sanctuary compared to non-feeding trees. This should be taken into consideration while selecting tree species for plantation in bear habitat.

5. Rain water harvesting and ground water recharge work must be taken up on priority in sanctuary area since natural water availability inside the sanctuary will be beneficial for all wildlife species. More number of water holes should be developed using geospatial techniques.

6. A very minimal or negligible presence of agricultural product or crop residual was observed in the sloth bear scat which suggests that sloth bears do not feed on standing crops in agricultural fields but it comes probably in search of hiding spaces, water or simply as corridors for their movement. Movements of Sloth bears towards the village can be checked.

7. During present study we came across three incidences of Sloth bears falling in wells around agricultural lands (two cubs were successfully rescued while

one adult male was found dead due to drowning). The walls of the well were found to be very low (1- 2 feet). Provisions should be made to identify such wells in and around forest areas under Buldhana forest division and sanctuary to increase the height of such wells to prevent such incidences of Sloth bear accidentally falling in the well.

8. The Dnyanganga sanctuary should be declared as Sloth Bear Sanctuary which will help to highlight Sloth bear presence and the habitat management can be done with priority to sloth bear.

9. The Forest department should have a unified control system for all the forest area under the Buldhana forest division and sanctuary areas, which will help in proper wildlife habitat management of overall forest area. It will be beneficial to take precautionary measures at the earliest in such situations, which will help to decrease the response time, enabling to start the rescue operation as soon as possible. Thus, Primary Response Teams should be formed and trained with especial focus towards sloth bear in such identified areas. (Buldhana Forest division).

10. Forest staff working in protected areas or territorial forest are most prone for Sloth bear conflicts since many a times the staff posted in area with regular sloth bear movement doesn't have exposure to situations of Human-Sloth bear conflict and do not have knowledge about sloth bear ecology, behaviour or other requirements. Field staff capacity building for sloth bear monitoring and rescue should be done on regular intervals.

11. In case of any human causalities by bear, immediate help in the form of available resources like forest staff, vehicles for immediate help and financial aid and payment of compensation according to severity of injuries should be provided as soon as possible. This will help not only help to avoid retaliatory killing of sloth bear by villagers but also maintain a good relation and understanding between villagers and ground forest staffs.

12. A standard proforma (a proforma is attached with the report) is provided to the staff to report the incidence in case of sloth bear attack. Analysis of this

collected data over a period will be helpful to design mitigation measures and habitat management strategies.

13. Sloth bear sighting records should be maintained throughout the division in a uniform fashion. This will help in monitoring the sloth bear movement and alarm the villagers regarding bear presence.

14. The human presence and movement of villagers and forest dwellers has to be strictly regulated in territorial forest areas also with total and strict prohibition at dawn and dusk especially in areas identified to have regular sloth bear movements.

15. Bears occurred mainly in the hilly terrain adjoining the villages so use of such areas by villagers for cattle grazing and collecting MFP should be restricted to avoid human-wildlife conflicts.

16. Human perception to wild animals may influence the survival of a species and therefore has crucial conservation implications. The sloth bear presence is not new for those villagers residing or having agriculture land along the forest areas, they are observing sloth bears presence in their farms from generations but the situation has worsened due to growing intolerance due to increasing myths and rumours about the sloth bear behaviour and feeding ecology spread by social and print media. The media people should be made aware about the real and scientific information on sloth bear and its ecology. At least one media awareness camp should be organize in a year.

17. Proper precautions should be taken to indicate your presence, while moving through areas with Sloth bear movement. Instruments like stick with a bell (called ghanti kathi / ghungru kathi) or pepper spray should be used by villagers and forest staff to avoid encounters since it provides a measure to avoid conflict.

18. Plantation of trees especially non-fruit bearing trees should be planted in forest areas adjoining villages and agricultural lands to increase vegetation.

19. Lantana camara, is an invasive species providing food, hiding space for sloth bears. Thus, dense Lantana patches should be cleared using selective

clearing method near the village and agricultural fields; leaving patches within sanctuary area with no human disturbance.

20. Electricity in the area is available only during night hours thus farmers have to go in agricultural fields during night for watering the crop. This forces villager's movement during dusk and dawn between field and home. This leads to regular confrontation of local people with wild animals especially Sloth bears in nearby places of agricultural fields. Electricity should be made available by electricity board during day time at least in conflict prone areas for few hours. Forest department should coordinate concern authority for this issue. Some techniques such as fencing with solar fences, reflecting tapes, auto sound producers, wired fencing along with thorny logs, trenches can be made along the forest areas along agricultural lands to keep away bears entering into farms. (Buldhana Forest division)

21. Community awareness programmes such as habits and habitats of Sloth bear should encourage through local forest staff, institutes and NGOs.
